

**HJ0006 –Use of Nuclear Weapons--March 3, 2025; 12:00 PM, Rules and  
Executive Nominations.     Position: SUPPORT (FAV) Testimony of James P.  
Wagner, Ph.D., L.E.H.S. on behalf of our new, interdisciplinary organization, Plant  
the Light**

Our favorable testimony focuses particularly on why this is a Maryland State issue. I enumerate these points below.

**1) The Federal government is largely not acting**, despite the collapse of cornerstone nuclear weapons treaties such as the INF (Intermediate Range Nuclear Forces Treaty (2019) and Russia suspending its participation in the last remaining Treaty (the New START Treaty) about 2 year ago, and the looming expiration of this Treaty in less than one year.

**2) Given that** Federal policy makers are not acting, and given that Marylanders are under an increasing threat from nuclear weapons (see below “Doomsday Clock”), **we call on our State and Local Governments to fulfill their obligation to protect their citizens.** We want State and Local Governments to step in and do everything within their powers to protect us from nuclear weapons. This Resolution (HJ0006/ SJ0004) is one thing that our State government can do toward its obligation to protect and serve its citizens.

**3)** In a sphere of activity where Federal action is lacking or where the activity is ostensibly Federal purview, **there is substantial precedent for States taking their own, independent actions.** Examples in Maryland include the State minimum wage, our State's RPS renewable portfolio energy standard, and our State's wide-ranging environmental legislation, in which facilities (including Federal facilities) must be permitted by Maryland and must follow Maryland Regulations. Nuclear weapons policy has traditionally been left up to the Federal government, but in the absence of Federal action, it is the obligation of Local and State governments to act with all their means on the issue.

**4) To date, across the U.S., there is wide and growing consensus** that state and local governments have a right to be engaged in the conversation on nuclear weapons. 75 Municipalities and Counties and 7 state legislative bodies have already adopted Resolutions similar to HJ0006/ SJ0004. Please see <https://preventnuclearwar.org/>

**5) HJ0006 and SJ0004 mirrors Federal Resolution** from the 118th Congress, [H. Res. 77](#), and call for support of the new version of it, soon to be introduced in the current (119th) Congress. They represent a collaboration between Maryland and the other jurisdictions across the country, as well as the 40+ enlightened members of Congress (those who had endorsed H.Res. 77) to reduce the nuclear threat. The House and Senate of Maryland have every right to make this statement and join in this collaboration. Indeed, with the [Doomsday Clock](#) now at 89 seconds to midnight, and with nuclear weapons cited as a major factor in its recent advancement toward “midnight,” it is the duty of Maryland House and Senate to join in this collaboration.

**6) The Treaty on the Prohibition of Nuclear Weapons (TPNW)**, cited in both State Resolutions, and a centerpiece of the Federal Resolution, was adopted in the UN in 2017, in overwhelming consensus by the countries of the world. There is global consensus that nuclear weapons must be eliminated. **Contact:** James P. Wagner with any questions: 240-586-1215, [your.james.wagner@gmail.com](mailto:your.james.wagner@gmail.com)
