

Judicial Proceedings Committee
Senate Bill 933
UNFAVORABLE

Honorable Chair, Vice Chair, and Members of the Judicial Proceedings Committee;

Please give Senate Bill 933 an Unfavorable report.

I'm sure there are already laws against forcing someone to ingest medications or other substances. This bill is absolutely unnecessary. If the sponsor and cosponsors actually wanted "women's freedom from coercion," they'd sponsor a bill condemning anti-abortion "crisis pregnancy centers," which are known for lying and coercion. Or they could even sponsor a bill to provide free reproductive healthcare, including abortion, for people who get pregnant through coercion, lying, or force. But we won't ever see that.

Please vote against this bill. Thank you.

Sincerely,
Debi Jasen
Pasadena, MD
