

To whom it may concern,

I believe this should have been a bill a long time ago, you have to when you're driving a vehicle so why would you not when driving a boat? You never know what damage you have caused until you take a minute to check everyone and everything out.

If you do not stop you should be penalized just as you were in a vehicle, the person(s) left behind could be injured or killed. Minutes matter in emergencies and every minute they are left stranded is a risk to life. Please consider passing this bill to protect life and property

Thank you for your consideration,
