

HB0161

Pls withdraw

Primary and Secondary Education - Comprehensive Health Education Framework -
Established

I am writing in opposition to HB0161. Parents can see this as an instrument to sexualize children, not protect them. Once again the "State" is dictating how parents raise children. It is up to the parents when these types of topics are breached with the children, NOT THE SCHOOLS. This is overreach on parent control and responsibility with regards to raising children. Please withdraw this bill!
