

My name is Logan Brady. I am 15 years of age and the cousin of Mason Kearns. Mason, as you know, tragically died on July 31, 2025 at the age of 13. Mason's death directly impacted our whole family. The impact was so much so that it didn't and doesn't feel right to bring up memories. My favorite thing to do with Mason was ride bikes down the street and fish at the inlet when we would be on vacation together. Mason mostly never caught anything, yet he still came. Thinking about how we will never be able to do that again is heart shattering. I believe absolutely no family, friends, or community members should have to think about never seeing a loved one again. Therefore I 100% fully support Mason's Law being passed to make sure no one has to go through what Mason, our family, our friends and our community went through.
