

My name is Amy Tanner and to allow women to have a choice in trying to save their hair was my idea. I took the idea to Delegate Nkongolo and testified last year, bald head and all.

I am a 47 year old mother of 4, I was diagnosed with triple negative breast cancer in November of 2024. I went thru trial chemo and had residual cancer after surgery so I then had to do standard of care. 21 rounds of chemo in total. I lost my hair again after it had just started growing back. Very tough journey but I am tough also.

I finally finished treatment in Dec of 2025 and completed all surgeries before the year was up. My hair is finally growing back! My sadness now lies in the fact that my son in getting married this summer and to of had hair in pictures, my hair would have made all the difference in the world. Pictures are forever
