¹ Effective January 1, 2014, the Primary Adult Care program ended and recipients became eligible for full Medicaid benefits under the Medicaid expansion option provided in the federal Affordable Care Act.

² Residential services include community residential services and individual family care. Day services include activities during normal working hours such as day habilitation services, supported employment, and summer programs. Support services include individual and family support, Community Supported Living Arrangements, and self-directed services.

³ The Developmental Disabilities Administration data includes secure evaluation and therapeutic treatment center units.

Issues

1. Cigarette Restitution Fund: Ongoing Litigation Has Significant Impact on Fiscal 2015 and 2016 Budget

Background

The Cigarette Restitution Fund (CRF) was established by Chapters 172 and 173 of 1999 and is supported by payments made under the Master Settlement Agreement (MSA). Through the MSA, the settling manufacturers pay the litigating parties – 46 states (Florida, Minnesota, Mississippi, and Texas had previously settled litigation), five territories, and the District of Columbia – substantial annual payments in perpetuity as well as conform to a number of restrictions on marketing to youth and the general public.

The distribution of MSA funds among the states is determined by formula, with Maryland receiving 2.26% of MSA monies, which are adjusted for inflation, volume, and prior settlements. In addition, the State collects 3.3% of monies from the Strategic Contribution Fund, distributed according to each state's contribution toward resolution of the state lawsuits against the major tobacco manufacturers.

The use of the CRF is restricted by statute. Activities funded through the CRF in fiscal 2015 include the Tobacco Use Prevention and Cessation Program; the Cancer Prevention, Education, Screening, and Treatment Program; substance abuse treatment and prevention; the Breast and Cervical Cancer Program; Medicaid; tobacco production alternatives; legal activities; and nonpublic school textbooks.

The Nonparticipating Manufacturer Adjustment

One of the conditions of the MSA was that the states take steps toward creating a more "level playing field" between participating manufacturers (PM) to the MSA (and thus subject to annual payments and other restrictions) and nonparticipating manufacturers (NPM) in the agreement. This condition is enforced through another adjustment to the states' annual payments, the NPM adjustment. The PMs have long contended that the NPMs have avoided or exploited loopholes in state laws that give them a competitive advantage in the pricing of their products. If certain conditions are met, the MSA provides a downward adjustment to the contribution made by PMs based on their MSA-defined market share loss multiplied by three. This adjustment is known as an NPM adjustment. The agreement also allows PMs to pursue this adjustment on an annual basis.

Under the MSA, PMs have to show three things in order to prevail and reduce their MSA payments:

• a demonstrable loss of market share of over approximately 2%;

- that the MSA was a significant factor contributing to that loss of market share; and
- a state was not diligently enforcing its qualifying statute.

The qualifying statute is intended to create a more level playing field with regard to the price between the PMs and the NPMs. Originally included in the MSA as a model statute, Maryland's qualifying statute was enacted in 1999 (Chapter 169), with subsequent revisions in the 2001 and 2004 sessions.

As shown in **Exhibit 1**, litigation regarding the NPM adjustment started in 2005, beginning with the NPM adjustment for sales year 2003. Arbitration regarding the "diligent enforcement" issue for 2003 commenced in July 2010. As further shown in the exhibit, Maryland was 1 of 15 states that did not settle with the PMs during the arbitration process and was 1 of 6 states that were found to not have diligently enforced its qualifying statute. Among the findings made by the arbitration panel were that Maryland lacked dedicated and trained personnel to conduct enforcement efforts and that the Comptroller's office, in particular, failed to meaningfully participate in enforcement efforts.

Exhibit 1 Nonparticipating Manufacturer Litigation Timeline

| <u>Date</u> | <u>Item</u> |
|-----------------------|---|
| April 2004 | PMs give notice to state attorneys general that they were pursuing an NPM adjustment with respect to a loss of market share in sales year 2003. A similar adjustment is sought for subsequent sales years. The PMs may place that portion of their annual payments they believe should be reduced under this process into an escrow account. Some PMs elect to do this, reducing the funding available to the states in any given year. |
| March 2006 | An economic firm rules for PMs that MSA participation was a significant factor in the PMs' market share loss, which had previously been calculated by the MSA Independent Auditor. Similar rulings are made for subsequent sales years. |
| April 2006 | Additional PMs place disputed payments related to 2003 NPM Adjustment into escrow account. |
| Calendar 2006-2009 | Maryland (like many other states) argues that the issue of whether it diligently enforced its Qualifying Statute should be made in State courts. The PMs prevail in that the diligent enforcement issue is subject to the MSA's arbitration clause. |
| January 2009 | Most states sign an agreement to enter into arbitration. The agreement includes a 20% refund of the liability of each joining state that is eventually determined to not have diligently enforced. |
| July 2010 | Arbitration proceedings begin for 46 states, the District of Columbia, and various territories. |
| November 2011 | PMs file statements of contest against all but 15 states in the arbitration. |

| <u>Date</u> | <u>Item</u> |
|-----------------|--|
| March-June 2013 | Twenty other states and the District of Columbia enter into a settlement agreement with the PMs – leaving 15 states, including Maryland, to proceed with arbitration. |
| September 2013 | Six states (Indiana, Kentucky, Maryland, Missouri, New Mexico, and Pennsylvania) are determined to not have diligently enforced their qualifying statute for sales year 2003. These states not only lose payments from PMs that have been held in escrow for that sales year, but also see a reduction in their future MSA payments for the states that are found to have diligently enforced their qualifying statutes. In addition to the \$16 million placed in escrow for that sales year, and after the 20% refund resulting from entering into arbitration, Maryland sees a reduction in its April 2014 MSA payment of \$67 million. |
| November 2013 | Maryland petitions the Baltimore City Circuit Court to vacate the arbitration award finding that Maryland did not diligently enforce its qualifying statute during 2003 as well as the arbitration panel's judgment reduction. |
| February 2014 | A hearing is held in Baltimore City Circuit Court. Supplemental briefs are filed by both sides in March through May 2014. |
| July 2014 | The Baltimore City Circuit Court denies Maryland's petitions. |
| August 2014 | Maryland appeals the Baltimore City Circuit Court's decision to the Maryland Court of Special Appeals. Appellate briefs are to be filed by both sides between February and April 2015, with oral argument set for May 2015. Meanwhile, arbitration regarding Maryland's diligent enforcement during sales year 2004 is expected to begin within calendar 2015. |

Legislative Services

As also noted in the exhibit, Maryland not only forfeited \$16 million that the PMs placed in escrow for the 2003 sales year, but under the MSA arbitration framework, also saw its fiscal 2014 payment reduced by \$67 million. The fiscal 2015 budget assumed that the State would receive \$40 million in relief from the adverse arbitration ruling, but since the State lost its first appeal of the ruling, the collection of any relief in fiscal 2015 is unlikely. The State is now appealing the circuit court's decision, and ongoing litigation may still result in a reduction of Maryland's 2003 NPM adjustment liability. Thus, the budget provides Medicaid with a \$40 million general fund deficiency for fiscal 2015 but assumes that the State's liability will be reduced by \$40 million in fiscal 2016. Oral argument before the Maryland Court of Special Appeals is set for May 2015.

At this time, it is inappropriate to speculate on the likelihood that the State will prevail in its appeal. It is also impossible to know how long proceedings will take, although it is likely that any ruling will be appealed to the Maryland Court of Appeals.

Fiscal 2014-2016 CRF Programmatic Support

Source: Department of Legislative Services; Department of Budget and Management

As shown in the exhibit, available fiscal 2015 revenues have been reduced by \$13 million to adjust for an overpayment in fiscal 2014. This one-time underpayment is attributable to an underpayment made to another state (Pennsylvania) in fiscal 2014. In April 2014, just as payments to states were being made, a Pennsylvania court ruling restored most of the 2014 payment that Pennsylvania was going to lose as a result of an arbitration panel's ruling in 2013. In addition, compared to data shown during fiscal 2015 budget deliberations:

- actual fiscal 2014 revenues were slightly higher than projected while expenses for legal activities for nonpublic school textbooks were slightly lower than projected, translating into a larger fiscal 2014 fund balance;
- as discussed in detail above, available fiscal 2015 revenues have been reduced by \$40 million (reflected in lower Medicaid support) as a result of the recent adverse ruling on the State's appeal; and

¹ The NPM adjustment represents the bulk of this total adjustment.

²Other adjustments include the strategic contribution payments and the National Arbitration Panel Award.

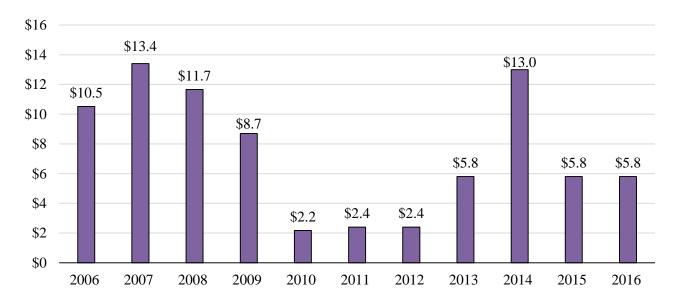

³ Amounts reflect a fiscal 2015 Board of Public Works cut and fiscal 2016 contingent reduction to CRF-funded cancer research grants and substitution of those funds for general funds in Medicaid. See text for additional details.

⁴ Fiscal 2014 Medicaid funding reflects the withdrawal of \$70 million in available funding based on the September 2013 arbitration ruling. Fiscal 2016 Medicaid funding assumes some adjustment in the arbitration ruling. See text for additional details.

• for fiscal 2016, CRF support is anticipated to significantly increase. While underlying revenues are assumed to be the same as in fiscal 2015 (other than the removal of the one-time overpayment adjustment), again as discussed above, assumptions are made about revenues related to the arbitration ruling.

On the expenditure side, significant growth in funding for Medicaid reflects anticipated higher available CRF support. A 2015 Board of Public Works action reduced funding for CRF cancer research grants to academic health centers by \$7.45 million and substituted those special funds for general funds in Medicaid. A fiscal 2016 contingent reduction reduces funding for CRF cancer research grants to academic health centers by \$7.2 million for the same purpose – bringing funding for each fiscal year to \$5.8 million, as shown below in **Exhibit 3**. This amount of funding is equal to what was provided in fiscal 2013.

Note: Amounts reflect a fiscal 2015 Board of Public Works cut and fiscal 2016 contingent reduction to cancer research grants and substitution of those special funds for general funds in Medicaid. See text for additional details.

Source: Department of Health and Mental Hygiene

It should be noted that the Budget Reconciliation and Financing Act of 2015 would reduce statutorily mandated CRF funding for academic health centers from \$13.0 million annually to \$5.8 million annually in fiscal 2016 and beyond.

Beyond the 2003 Sales Year

The NPM adjustment is in dispute for future years; thus, unless it is settled or Maryland's diligence is not contested, there will be future arbitrations assessing Maryland's enforcement for future years. It is worth noting that although the arbitration ruling found that Maryland was not diligent in enforcing its qualifying statute in the 2003 sales year, the ruling also notes that the State did take actions to position it "well for diligent enforcement in 2004." Data regarding the extent of noncompliant packs of cigarettes, NPM escrowing, and enforcement efforts support this comment not only for the 2004 sales year but also subsequent years.

Those states that did settle with the PMs realized a one-time cash windfall with the release of funds from disputed payments escrow accounts for sales years 2003 through 2012. However, under the terms of the settlement, the PMs were given credit for future payments from those states (*i.e.*, reducing the payments to those states), and those states need to enact new legislation and will be held to an enhanced standard in NPM adjustment disputes beginning in 2015.

The PMs have sought a multi-state arbitration related to sales year 2004 for Maryland and those other states that did not settle the 2003 sales year litigation. Arbitration regarding Maryland's diligent enforcement during sales year 2004 is expected to begin within calendar 2015.

2. Measuring Progress in Health: America's Health Rankings, 2014

One of the more comprehensive and longstanding nationwide health rankings is developed by the United Health Foundation (a nonprofit, private foundation established by UnitedHealth Group), the American Public Health Association (an organization representing public health professionals), and Partnership for Prevention (a national nonprofit organization dedicated to health improvement). Since 1990, in a publication entitled *America's Health: State Health Rankings*, individual state rankings have been produced using data that represents a broad range of issues affecting a population's health, that is available at a state level and that is current.

America's Health rankings are developed from a variety of so-called determinant factors that include behaviors (e.g., the prevalence of smoking and obesity), community and environmental factors (e.g., air pollution levels and children in poverty), public health policies (e.g., rates of health insurance and immunization coverage), and clinical care (e.g., access to dental and primary health care practitioners), as well as a variety of outcomes (e.g., rate of adult diabetes and infant mortality).

As shown in **Exhibit 4**, in the 2014 edition of *America's Health*, Maryland's overall ranking rose to 16 from 24 in the prior year. This represents the State's highest-ever ranking among the states and is attributable to positive trends in child poverty, smoking, and binge drinking. Along with low prevalence of smoking, areas of strength for the State include high immunization coverage among children and ready availability of primary care physicians, while the State's most significant health challenges continue to be relatively high rates of violent crime, air pollution, and low birthweight.
