**Racing Commission:**

**Thoroughbred Rules: COMAR 09.10.01.89**

According to the department, the purpose of this action is to allow the thoroughbred tracks to offer a new type of bet called the Roulette wager. The track offering this type of wager will designate two or more horses in a race in a category of black, green or red. The patron shall select a color and if any of the horses designated as that color win, the patron will have a successful wager.

The commission indicates that this type of wager has been used in Florida and California on big event days. Because there are many individuals who attend the races for the first time on these big event days they do not have much handicapping experience. This wager provides a different method of selecting a winner and is being used as a marketing tool for Preakness week.
