

Department of Legislative Services  
Maryland General Assembly  
1999 Session

**FISCAL NOTE**

Senate Bill 597 (Senator Dvson)

Judicial Proceedings

---

**Vehicle Laws - License Restriction for a Minor -  
Prohibition Against Minors as Passengers**

---

This bill prohibits a licensed driver under the age of 18 from driving with a passenger under the age of 18 (except specified relatives) for 180 days after the driver's license is issued. A police officer may only enforce this provision as a secondary violation.

---

**Fiscal Summary**

**State Effect:** Indeterminate increase in Transportation Trust Fund (TTF) expenditures. Minimal increase in general fund revenues.

**Local Effect:** None. Enforcement could be handled with existing resources.

**Small Business Effect:** None.

---

**Fiscal Analysis**

**State Revenues:** General fund revenues could increase from the penalty provision applicable to this offense under the Maryland Vehicle Law (maximum \$500 fine). Because the violation can only be enforced as a secondary violation and the number of drivers under 18 is a small percentage of the driving population, any such increase is assumed to be minimal.

**State Expenditures:** The Motor Vehicle Administration (MVA) issues approximately 41,000 provisional driver's licenses each year. The restriction provided by the bill would be in effect for the first 6 months of the 1-year term of the provisional license. The MVA would need to reissue the provisional license after 6 months to remove the restriction. Reissuing a

license costs the MVA approximately \$2 for supplies. Assuming that 41,000 licenses will be reissued, TTF expenditures will increase by \$82,000 per year.

Additionally, the MVA estimates that the bill will result in overtime costs of \$71,300 in fiscal 2000 to reissue the provisional licenses in order to remove the restriction. However, the Department of Legislative Services (DLS) advises that all the MVA branches may not be operating at full capacity. It is possible that some of the additional work could be performed without paying overtime.

The MVA advises that computer programming expenditures could increase by an estimated \$10,000 to modify the computer programs to add a new restriction code. DLS advises that if other legislation is passed requiring computer reprogramming changes, economies of scale could be realized. This would reduce computer programming costs associated with this bill and other legislation affecting the MVA system. Further, DLS advises that the increased computer expenditure is simply an estimate and the MVA may be able to handle the changes with either less money than it estimates or existing resources. The MVA could impose the license restriction with existing staffing resources.

Enforcement could be performed with existing resources.
