Maryland General Assembly
2000 Session

FISCAL NOTE

House Bill 1343 (Delegate Schisler)

Environmental Matters

Fisheries Management - Tidal Fish Licenses - Authorizations

This bill allows a licensee who possesses three or more specified tidal fish license authorizations to, at the time of license renewal, relinquish each authorization and receive an unlimited tidal fish license authorization. DNR must adjust the number of authorizations to reflect the number of license conversions. The bill also allows DNR to modify by regulation the target number of tidal fish license authorizations based on the number of authorizations relinquished to DNR pursuant to the bill.

The bill takes effect July 1, 2000.

Fiscal Summary

State Effect: General fund expenditure increase of \$10,400 in FY 2001 only to upgrade DNR's information network system and application forms. To the extent that license fees for relinquished and new licenses vary, the bill could affect special fund finances.

Local Effect: None.

Small Business Effect: Potential meaningful.

Analysis

Current Law: DNR must issue a tidal fish license authorizing participation in a particular fishing activity to a person who has completed the requirements of an apprenticeship. DNR by regulation must set targets for the number of tidal fish license authorizations to be the number issued between September 1, 1998, and March 31, 1999. DNR by regulation may modify the target number of authorizations based on specified recommendations and factors.

DNR must provide in its regulations for reallocation of any authorizations that may be revoked or voluntarily relinquished to DNR. Fees for tidal fish licenses that could be relinquished pursuant to the bill range from \$37.50 to \$250. The unlimited tidal fish license fee is \$300. License fees are paid into the Fisheries Research and Development Fund.

Background: As of March 1999, DNR had issued 8,662 tidal fish licenses. Chapters 418 and 419 of 1998 (SB 679 and HB 1260) established an apprenticeship program to provide a mechanism for individuals to enter the commercial fishery after acquiring practical experience relating to commercial fishing activities. To date, DNR has issued 184 permits to participate in the apprenticeship program. DNR advises that 525 people are on the waiting list for the apprenticeship program.

Chapters 418 and 419 of 1998 also provided, for the license year beginning September 1, 1998 only, for a license to convert three specified tidal fish licenses to an unlimited tidal fish license at the time of license renewal.

State Fiscal Effect: General fund expenditures would increase by an estimated \$10,400 in fiscal 2001 only. This estimate includes \$10,000 for DNR to upgrade its existing consumer-oriented information network system and \$400 to update the annual tidal fish application renewal forms to include transfer provisions. DNR could handle any increased workload related to transfers with existing resources.

To the extent that individuals take advantage of the bill's flexibility relating to relinquishing and obtaining new tidal fish licenses, the bill could result in a net increase in special fund revenues or a net increase in special fund expenditures. Fees for those licenses that could be relinquished pursuant to the bill range from \$37.50 to \$250. The fee for an unlimited tidal fish license is \$300. It is assumed that any difference between the total fees for relinquished licenses and the fee for an unlimited tidal fish license would be paid by the licensee (if the total fees for relinquished licenses are less than \$300) or reimbursed by DNR to the licensee (if the total fees are more than \$300). Legislative Services advises, however, that because the number and types of licenses that would be involved cannot be predicted, a reliable estimate of any net effect cannot be made at this time. Because the total number of authorizations would be adjusted to reflect any conversions, the total number of authorizations would decline.

Small Business Effect: To the extent that a tidal fish licensee takes advantage of the bill's flexibility, it could have a positive impact because the unlimited tidal fish license allows a licensee to fish in any of the specified tidal fish categories as well as to provide services as a fishing guide. Depending on the difference between the total fees for the three relinquished authorizations and the fee for the unlimited tidal fish license, a licensee would either be required to pay the difference in the fees or would be reimbursed the difference by DNR.
