Department of Legislative Services

Maryland General Assembly 2001 Session

FISCAL NOTE

House Bill 1273 (Delegates Leopold and Rosenberg) Environmental Matters

Smart Growth - Priority Funding Areas - Designation by Two or More Counties

This bill authorizes the governing bodies of two or more counties to designate a priority funding area that combines two or more contiguous areas located in each of the counties. The bill also authorizes a State funding agency to give priority consideration to funding a project in a priority funding area designated by two or more county governments pursuant to the bill. The State Economic Growth, Resource Protection, and Planning Commission must develop and adopt regulations to implement the bill by June 1, 2002.

Fiscal Summary

State Effect: The bill's requirements could be handled with existing budgeted resources.

Local Effect: While the bill provides additional flexibility with respect to the designation of priority funding areas, the bill is not anticipated to significantly affect local operations or finances.

Small Business Effect: Potential minimal.

Analysis

Current Law: The governing body of a county may designate priority funding areas under specified conditions relating to zoning, density, availability of public or community sewer systems, inclusion in water and sewer plans, designation as a local growth area or rural village, and capacity of land areas available for development.

To be eligible for funding for growth-related projects, a local government must certify to the Department of Planning any area designated as a priority funding area. Prior to certification, the local government may submit the proposed priority funding areas and any relevant information to the Department of Planning for technical assistance, review, and comment, and the opportunity for public review. Upon certification, the local government must provide to the Department of Planning all information necessary to demonstrate the precise location of the area, including a map of the area showing planning and zoning characteristics, and existing and planned water and sewer services as appropriate. Prior to funding a growth-related project, the State funding agency must obtain from the local government a written statement that the proposed growth-related project is located within a certified priority funding area.

Background: In 1997 the General Assembly enacted Governor Glendening's Smart Growth and Neighborhood Revitalization legislative package in an effort to reduce the impact of urban sprawl on the environment and encourage growth in existing communities. The initiative, which was designed to protect Maryland's green spaces and to preserve the State's rural areas, aims to manage growth by restricting State funding to designated priority funding areas. The Smart Growth legislation established certain areas as priority funding areas and allowed counties to designate additional areas if they meet specified requirements for use, water and sewer service, and residential density. **Exhibit 1** lists the areas initially established as priority funding areas and areas eligible for county designation.

Exhibit 1 Smart Growth – Priority Funding Areas

Areas Initially Established	Areas Eligible for County Designation
Municipalities	Areas with industrial zoning
Baltimore City	Areas with employment as the principal use,
Areas inside the Baltimore and Washington	which are provided with or planned for sewer
Beltway	service
Revitalization Areas designated by the	Residential areas which have an average
Department of Housing and Community	density of two or more units per acre, are
Development	within designated growth areas, are designated
Enterprise Zones	growth areas, and are served by water or sewer
Heritage Areas	systems
	Rural Villages
	Other areas within county designated growth
	areas
