CHAPTER \_\_\_\_\_

1 AN ACT concerning

2 **Maryland Water Conservation Act**

3 FOR the purpose of requiring certain public water systems and sewage treatment  
4 plants to include a description of certain water conservation practices when  
5 applying for a new or expanded water appropriation or wastewater discharge  
6 permit; requiring the Department of the Environment to consider certain  
7 matters in reviewing and approving certain water appropriation or wastewater  
8 discharge permit applications; requiring the Department to issue guidelines on  
9 certain water conservation practices by a certain date; specifying a certain State  
10 policy; defining certain terms; and generally relating to water conservation  
11 practices of public water systems and sewage treatment plants.

12 BY adding to  
13 Article - Environment  
14 Section 5-5B-01 through 5-5B-05, inclusive, to be under the new subtitle  
15 "Subtitle 5B. Maryland Water Conservation"  
16 Annotated Code of Maryland  
17 (1996 Replacement Volume and 2001 Supplement)

18 Preamble

19 WHEREAS, Greater efficiency in water use and conservation can reduce the  
20 financial costs associated with treatment, storage, and transmission of water and  
21 wastewater necessary for Maryland's growing population, thus making better use of  
22 the limited financial resources available for such improvements; and

23 WHEREAS, Data compiled by the State and published by the United States  
24 Environmental Protection Agency show that in the next 20 years, more than

1 \$2,000,000,000 will have to be invested by public water systems, wastewater  
2 treatment plants, and State agencies in order to accommodate growth and to improve  
3 the quality of drinking water and the treatment, storage, and transmission of  
4 wastewater; and

5 WHEREAS, Improvements in efficient use of water and overall water  
6 conservation measures will limit negative environmental impacts on Maryland's  
7 aquatic resources, which are associated with withdrawing surface water and  
8 groundwater and discharging wastewater; and

9 WHEREAS, More efficient use of limited financial resources available for  
10 improving wastewater treatment will accelerate achievement of water quality goals,  
11 including the goals of the Chesapeake Bay Agreements; now, therefore,

12 SECTION 1. BE IT ENACTED BY THE GENERAL ASSEMBLY OF  
13 MARYLAND, That the Laws of Maryland read as follows:
