9 Section 10-616(t)

10 Annotated Code of Maryland

11 (2004 Replacement Volume)

12 Preamble

13 WHEREAS, The United States imports more than 62% of its oil and this

14 percentage is expected to grow to more than 77% by the year 2025; and

15 WHEREAS, The use and production of clean burning, domestically produced

16 renewable fuels, such as ethanol and biodiesel, will reduce the United States'

17 dependence on foreign oil; and

18 WHEREAS, Ethanol production has doubled nationally in the last ten years, to

19 a level where 84 plants in 20 states have a capacity to produce 3.4 billion gallons

20 annually, mostly in states that have offered production credits and other incentives;

21 and

22 WHEREAS, Biodiesel production is anticipated to grow from its current 30

23 million gallons annually to 150 million gallons annually, due in part to the increased

24 demand for a clean-burning alternative to sulphur in diesel fuel; and

25 WHEREAS, The construction of ethanol and biodiesel production facilities will

26 provide expanded market opportunities for farmers and a value added enterprise that

27 will promote economic development in rural areas; and

28 WHEREAS, A facility producing biodiesel fuel made from Maryland soybean oil

29 would serve to create a stronger and more diverse local market for Maryland soybean

30 producers; and

31 WHEREAS, Small grains grown as a winter crop under a nutrient management

32 plan serve to take up nutrients remaining from the previous crop, holding these

33 nutrients in the field rather than polluting the Chesapeake Bay, and have been shown

34 to be extremely effective as cover crops; and

35 WHEREAS, An ethanol production facility producing 15 million gallons of

36 ethanol annually from small grains will generate the production of the equivalent of

37 an additional 100,000 acres of cover crops towards the acreage goals of the

1 Chesapeake Bay Commission and the Tributary Strategy Teams, which groups
2 consider cover crops to be one of the most cost effective methods of reducing the
3 amount of nutrients entering the Chesapeake Bay; now, therefore,

4 SECTION 1. BE IT ENACTED BY THE GENERAL ASSEMBLY OF
