<b>9. Description and Purpose of Grantee Organization</b>		
<p>Hospital Mission Statement: The mission of the Western Maryland Health System is to improve the health status and quality of life of the individuals and the community we serve, especially those in need. We provide patient and family centered services through responsible management of our human and fiscal resources.</p> <p>The Western Maryland Health System serves Allegany and Garrett Counties and portions of West Virginia and Pennsylvania. It provides a general acute care and a full range of medical, surgical, emergency and diagnostic services. The Health System operates the only Open Heart Surgery and Angioplasty service west of Baltimore. Further, the Health System operates the only acute psychiatric service within a 60 mile radius and is a Level III Trauma Service certified by MIEMSS.</p>		

**10. Description and Purpose of Project**

The current Emergency Departments are inadequately designed and out-moded in their ability to serve the much higher volume of patients requiring services for cardiac, psychiatric, and other types of emergency care. New construction will provide for better ambulance access, a chest pain/short-stay observation area, expanded treatment rooms and triage areas, improved accommodations for psychiatric/substance abuse patients, decontamination chamber and enhanced intake, registration and waiting areas. It is estimated that an additional 12,220 patients will visit the emergency department, increasing total visits to 70,412 per year.

The initiation of the Health System's Open Heart Surgery and Angioplasty programs created a much higher than anticipated demand for cardiac care. In fact, in the first year of operation, volumes of CABG and PTCA procedures exceeded second year program projections. It is estimated that there will be an additional 890 cardiac related visits for a total of 5,143 visits per year.

The Health System provides the only acute inpatient psychiatric care in Allegany and Garrett Counties. The hospital's Emergency Department is the primary site for psychiatric emergency and crisis intervention in the tri-state area. Within the past year volumes of psychiatric emergencies have increased over 50% in the hospital's Emergency Department. Facilities are inadequate to serve this volume of patients which will continue to increase. It is estimated that an additional 700 emergency mental health cases will be seen for a total of 2,343 cases per year.

*Round all amounts to the nearest \$1,000. The totals in Items 11 (Estimated Capital Costs) and 12 (Proposed Funding Sources) must match. The proposed funding sources must not include the value of real property unless an equivalent value is shown under Estimated Capital Costs.*
