9. Description and Purpose of Grantee Organization (3000 characters maximum)				
The Maryland-National Capital Park and Planning Commission (M-NCPPC) is a bi-county agency, empowered by the State of Maryland in 1927 to acquire, develop, maintain and administer a regional system of parks in Prince George's and Montgomery Counties. The M-NCPPC is also empowered to prepare and administer a General Plan for the physical development of most of the bi-county area and operate the public recreation program in Prince George's County.				

10. Description and Purpose of Project (3000 characters maximum)

The grant money will be used toward the design, construction, and capital equipping of the first phase of the Beltsville-Laurel Senior Center, a 22,000 square foot regional facility with 135 parking spaces on approximately 6.5 acres of land. The proposed center will be located on the campus of the Laurel Regional Hospital which is owned by Prince George's County. The M-NCPPC will build, maintain, and manage the facility.

The project will replace an existing facility of approximately 10,500 square feet that is housed in a leased building. Due to the expanding population of seniors in the area, the building has become inadequate to support the programs and services needed for this population. The existing facility, known as the Phelps Center, is housed in a building originally built in 1899 as a high school. The Phelps Center is home to 5 senior organizations serving 2,900 people. The population of seniors in the area is increasing rapidly due to seven nearby senior housing developments. The 55 and older population in the Beltsville/Laurel area has increased 25% over the past decade and according to the U.S. Census Bureau, it is expected to grow another 25% by the year 2010.

The first phase of the Beltsville-Laurel Senior Center will include a multi-purpose room with food service facilities, lounge, classrooms, craft room, billiards room, office space, storage, computer training room, fitness room, and game room. The building will be designed to accommodate a future addition that will increase the facility to 30,000 square feet. Subsequent phases of the center will be completed when funding becomes available.

Round all amounts to the nearest \$1,000. The totals in Items 11 (Estimated Capital Costs) and 12 (Proposed Funding Sources) must match. The proposed funding sources must not include the value of real property unless an equivalent value is shown under Estimated Capital Costs.
