FISCAL AND POLICY NOTE

Senate Bill 710

(Senator Conway, *et al.*)

Education, Health, and Environmental Affairs

Environmental Matters

Affordable Housing - Enabling Authority for Counties and Municipalities

This bill authorizes a county or municipality to support, foster, or promote an affordable housing program for low- or moderate-income households through various locally implemented methods or programs.

Fiscal Summary

State Effect: None.

Local Effect: The bill is enabling authority only and would not directly impact local government finances.

Small Business Effect: None.

Analysis

Current Law: A municipal or county government may currently participate in federal lower-income housing assistance programs. In addition, local governments that exercise planning and zoning authority under Article 66B may promote affordable housing through an adequate public facilities ordinance or an inclusionary zoning ordinance. The authority granted by the bill, however, would apply to all local governments and encourages programs other than those created by exercising planning and zoning authority.

Background: The generally accepted definition of housing affordability is when a household pays no more than 30% of its annual income on housing. Families who pay more than 30% for housing are considered cost burdened and may have difficulty

affording necessities such as food, clothing, transportation, and medical care. The U.S. Department of Housing and Urban Development estimates that 12 million households (renter and homeowner) pay more than 50% of their annual income on housing. The 2004 final report of the Governor's Commission on Housing Policy stated that as of 2000, one-third of Maryland households pay more than 30% of their income on rent. The report also stated that over the next 10 years there will be a shortage of 157,000 workforce/affordable rental units in the State.

In Maryland, the median price for owner-occupied real property was \$318,000 in fiscal 2006, up \$52,500 or 19.8% from the previous year. For comparison purposes, the median household income increased by 3.7% over the same period. The median sale price ranged from \$87,775 in Allegany County to \$425,000 in Montgomery County. **Appendix 1** shows the median household income and the median sale price for homes by county.

Local Fiscal Effect: While the bill would not directly impact local government finances, should a local government implement any of the programs authorized by the bill, local expenditures could increase. This increase would depend on the type, scope, breadth, and number of programs implemented by a local jurisdiction, none of which can be reliably estimated at this time.
