FISCAL AND POLICY NOTE

House Bill 1182

(Delegate Holmes)

Environmental Matters

Judicial Proceedings

Real Property - Mechanics' Lien - Land Surveying

This bill authorizes the establishment of a mechanic's lien for land surveying services on the land and its improvements for the payment of all debts for work in connection with such services, regardless of whether a building has been erected, repaired, rebuilt, or improved.

Fiscal Summary

State Effect: General and special fund revenues from recordation fees and surcharges would increase minimally for mechanics' liens recorded under the bill. Expenditures would not be affected.

Local Effect: None.

Small Business Effect: Minimal.

Analysis

Current Law: No provision authorizes a mechanic's lien if a building has not been erected, repaired, rebuilt, or improved. A building erected or repaired, rebuilt, or improved to the extent of 15% of its value is subject to the establishment of a lien for the payment of all debts contracted for work done and for materials furnished, including the drilling and installation of wells to supply water; the construction or installation of any swimming pool or fencing; the sodding, seeding, or planting of shrubbery or other nursery products; the grading, filling, landscaping, and paving of the premises; building

or landscape architectural services, engineering services, or land surveying services; and the leasing of equipment for use about the building or premises.

In order to establish a mechanic's lien, a person must file proceedings in the circuit court for the county where the land or any part of it is located within 180 days after the work has been finished or the materials furnished. The petition must at least state the name and address of the petitioner, the name and address of the owner, specified information about the work done or the materials furnished, a description of the land, and if the petitioner was a subcontractor, facts showing that the required notice was sent to the owner.

Background: Chapter 198 of 2006 added building or landscape architectural services, engineering services, and land surveying services to the mechanic's lien statute.

State Revenues: The recordation fee is \$20 for an instrument of nine or fewer pages in length or for an instrument involving solely a principal residence. The recordation fee is \$75 for other instruments of 10 or more pages in length. In addition, each recordable instrument is subject to a surcharge of \$20, which is deposited in the Circuit Court Real Property Records Improvement Fund. The number of liens recorded under the bill cannot be accurately estimated; however, it is assumed that the number recorded would be minimal. It is further assumed that any lien recorded under the bill would be nine or fewer pages. Therefore, general and special fund revenues would each increase by \$20 for each lien recorded under the bill.
