| <p>Our nation is experiencing a dearth of students majoring in the sciences. For the last five years, 100% of our graduates have been accepted to college. In 2006, the 124 graduates were accepted to 115 different colleges. We currently offer, in addition to our basic college preparatory science courses, Advanced Placement courses in biology and chemistry, and Honors Courses in biology, chemistry, physics, and anatomy/physiology. Science electives include human biology, environmental science and forensic science. We believe that we are well-positioned to focus on sending forth well prepared women to pursue careers in science-related fields. With updated facilities, the school's excellent faculty will be better able to accomplish this goal.</p> | | | |
