11. Description and Purpose of Project (3000 characters maximum)

The building which houses the Westchester Community Center was Baltimore County's first consolidated elementary school, and was constructed in 1924. The Westchester Center Foundation has been successfully running the community center for over 10 years now and has overseen several major improvements to it with the help of local and state government grants, including lighting and electrical upgrades, and new air conditioning in 2001. However, several parts of the facility still need refurbishment and renovation due to the age of the building. These include the boiler, which is at least 50 years old, the wood floor in the main hall, which we believe is the original floor (and which can no longer be refinished), the roof and roof drains (which are leaking and in need of replacement), and connection of the plumbing system to the main sewer line rather than to the current septic tank system. Once these renovations are made, all major physical systems in the building will have been upgraded and the community center should not need major upgrades to its physical plant for at least 20 years. Approximate costs are: for the boiler about \$50,000, for the floor replacement, \$30,000, for the roof and roof drain replacement, \$90,000, and for the sewer line connection \$35,000. This is a total of \$205,000.

Round all amounts to the nearest \$1,000. The totals in Items 11 (Estimated Capital Costs) and 12 (Proposed Funding Sources) must match. The proposed funding sources must not include the value of real property unless an equivalent value is shown under Estimated Capital Costs.
