

Department of Legislative Services
Maryland General Assembly
 2007 Session

FISCAL AND POLICY NOTE

Senate Bill 445 (Senator Colburn)
 Budget and Taxation

Income Tax - Subtraction Modification for Military Retirement - Expansion

This bill expands the existing military retirement income subtraction modification by: (1) increasing from \$5,000 to \$20,000 the maximum amount of retirement income that can be excluded from the State income tax; and (2) allowing individuals who retired before July 1, 1991 from active duty with the Commissioned Corps of the Public Health Service, the National Oceanic and Atmospheric Administration (NOAA), or the Coast and Geodetic Survey to qualify for the subtraction modification.

The bill takes effect July 1, 2007 and applies to tax years 2007 and beyond.

Fiscal Summary

State Effect: General fund revenues would decrease by \$45.3 million in FY 2008. Future years reflect annualization and estimated number of eligible taxpayers. Expenditures would not be affected.

(\$ in millions)	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012
GF Revenue	(\$45.3)	(\$31.6)	(\$32.6)	(\$33.5)	(\$34.5)
Expenditure	\$0	\$0	\$0	\$0	\$0
Net Effect	(\$45.3)	(\$31.6)	(\$32.6)	(\$33.5)	(\$34.5)

Note: () = decrease; GF = general funds; FF = federal funds; SF = special funds; - = indeterminate effect

Local Effect: Local government revenues would decrease by \$28.6 million in FY 2008 and by \$20.0 million in FY 2009. Future year losses would increase by approximately 3% annually. Expenditures would not be affected.

Small Business Effect: None.

Analysis

Current Law: Chapter 226 of 2006 expanded a \$2,500 military retirement income subtraction that was limited to enlisted military members with a federal adjusted gross income of \$22,500 or less. Under Chapter 226, an individual may exempt the first \$5,000 of military retirement income from State taxation if the retirement income resulted from: (1) service in an active or reserve component of the armed forces of the United States; (2) service in the Maryland National Guard; or (3) separation after July 1, 1991 from active duty with the Commissioned Corps of the Public Health Service, NOAA, or the Coast and Geodetic Survey. Military retirement income exempted under this provision cannot be counted towards the State pension exclusion. Chapter 226 is estimated to reduce State income tax revenues by \$10.2 million in fiscal 2008 and local income tax revenues by \$6.5 million.

Maryland law also provides a pension exclusion subtraction for individuals who are at least 65 years old or who are totally disabled. Up to a specified maximum amount of taxable pension income (\$22,600 maximum for 2006) may be exempt from tax. The maximum exclusion allowed is indexed to the maximum annual benefit payable under the Social Security Act and is reduced by the amount of any Social Security payments received. The pension exclusion has been a part of the Maryland income tax since 1965.

The “Social Security offset” is the reduction in the maximum pension exclusion allowed under the current law by the individual. The Social Security offset was established at the same time as the pension exclusion. Given that Social Security benefits are exempt from Maryland income tax, the offset works to equalize the tax treatment of individuals who receive their retirement benefits from different sources by reducing the amount of allowable exclusion by the amount of Social Security benefits received.

Social Security benefits and benefits received under the federal Railroad Retirement Act are totally exempt from the Maryland income tax, even though they may be partly taxable for federal income tax purposes. In addition to the special treatment of Social Security and other retirement income, other income tax relief is provided to senior citizens regardless of the source of their income. Each individual age 65 or older can also earn more income without being required to file taxes. The additional exemption amount allowed for elderly or blind individuals is \$1,000. This amount is in addition to the regular personal exemption of \$2,400.

Background: Chapter 94 of 2003 established the Task Force to Study the Financial Impact of Retired Military Service Personnel on the Economy of the State. The task force issued its final report in December 2003. Among its findings was that in 2000 there were approximately 42,600 military retirees living in Maryland. The task force estimated

that median household income of military retirees was \$71,484 compared with a median household income of \$42,151 for all Maryland households. The average income reported by military retirees was \$83,435, of which \$18,266 was attributable to retirement pay and \$65,169 was derived from second career employment and other sources. These military retiree households were estimated to pay approximately \$163 million in State and local income taxes.

According to the Defense Manpower Data Center (DMDC), 44,014 military retirees received a total of \$80 million in retirement income from the Department of Defense (DoD) in September 2004. This includes individuals who served in the Army (including Maryland National Guard), Navy, Marines, and Air Force. On an annualized basis, the retirement income totaled approximately \$958.4 million. This amount reflects 2,129 retirees who received approximately \$30 million annually in disability payments. Disability payments resulting from active service in the armed forces, NOAA, Public Health Service, or foreign service are not taxable for State income purposes because they are exempted from federal taxation. In addition, DMDC reports that 1,083 Coast Guard retirees received retirement income (including disability pay) in the amount of approximately \$22.4 million on an annual basis. Data on total nondisability pay for Coast Guard retirees were unavailable. Coast Guard retirees are paid by the Department of Homeland Security.

Exhibit 1 lists the average annual DoD-paid nondisability military retirement income received by Maryland residents in 2004 by age and whether or not the individual served as an officer or enlisted member. **Exhibit 2** lists the total retirement pay (including disability pay) received by Maryland military retirees by branch of service.

Total	49,131	45,097	\$980.8	\$21,749

Source: Defense Manpower Data Center

Compared to the rest of the nation, Maryland military retirees are on average younger and receive higher pensions. Approximately two-thirds of Maryland military retirees who receive a pension are under 65, compared with approximately 55% nationally. Nationally, the average age of a military retiree who retired in federal fiscal 2004 was 48.5. The average pension received by a State military retiree was approximately 11% higher than the national average.

According to the Office of Commissioned Corps Force Management Information System, 762 Maryland residents who retired from the Commission Corps of the Public Health Service received a total of \$52.1 million, or an average of \$68,312, in retirement income during 2005.

State Revenues: General fund revenues would decrease by approximately \$29.7 million in tax year 2007 and \$31.0 million in tax year 2008. It is assumed that most taxpayers will adjust withholdings and estimated payments. As a result, fiscal 2008 revenues would decrease by both the change in tax year 2007 revenues and also by one-half of tax year 2008, resulting in a decrease of approximately \$45.3 million in fiscal 2008. **Exhibit 3** shows the projected State and local revenue loss from exempting military retirement income. Annualization losses reflect the estimated number of eligible retirees, increases in retirement income, and the estimated cost of the current subtraction modification and pension exclusion provided for military retirement income.

Exhibit 3
Projected State and Local Revenue Loss – Military Exemption
(\$ in Millions)

<u>Fiscal</u>	<u>State</u>	<u>Local</u>	<u>Total</u>
2008	\$45.3	\$28.6	\$73.9
2009	31.6	19.9	51.5
2010	32.6	20.6	53.1
2011	33.5	21.2	54.7
2012	34.5	21.8	56.3

This estimate is based on the number of retirees and amount of retirement income received by State residents as reported by DMDC and Office of Commissioned Corps Force Management Information System and the following facts and assumptions:

- The number and pay of military retirees is increased from 2005 to 2012 based on the DoD's Office of Actuary projections for military retirees nationally.
- The current military subtraction modification is estimated to decrease State revenues by approximately \$9.9 million in tax year 2007.

Local Fiscal Effect: Local government revenues would decrease by 3% of the net change in State tax liability in tax year 2007 resulting from the provisions of the bill. In fiscal 2008 the decrease would be approximately \$28.6 million. Exhibit 3 lists the local income tax revenue impact by fiscal year.
