

**Department of Legislative Services**  
Maryland General Assembly  
2008 Session

**FISCAL AND POLICY NOTE**

Senate Bill 102  
Finance

(Senator Gladden)

---

**Hospitals and Nursing Facilities - Health Care-Associated Infections Prevention and Control Program**

---

This bill requires each hospital or nursing facility in the State to establish a Health Care-associated Infections Prevention and Control Program. The Department of Health and Mental Hygiene, in consultation with stakeholders, has to develop a system under which • hospitals and nursing facilities must report annually on incidents of methicillin-resistant staphylococcus aureus and vancomycin-resistant enterococcus; and • DHMH must submit an annual report on the incidence of MRSA and VRE in hospitals and nursing facilities.

The bill takes effect July 1, 2008.

---

**Fiscal Summary**

**State Effect:** DHMH general fund expenditures could increase by \$322,300 in FY 2009 to collect, analyze, and report data as required under the bill. Future year estimates reflect annualization and inflation. No effect on revenues.

(in dollars)	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013
Revenues	\$0	\$0	\$0	\$0	\$0
GF Expenditure	322,300	395,800	415,500	436,100	457,900
Net Effect	(\$322,300)	(\$395,800)	(\$415,500)	(\$436,100)	(\$457,900)

*Note: () = decrease; GF = general funds; FF = federal funds; SF = special funds; - = indeterminate effect*

**Local Effect:** None.

**Small Business Effect:** Potential meaningful. Small business nursing facilities could incur additional expenses due to mandatory testing and reporting.

---

## Analysis

**Bill Summary:** Each Health Care-associated Infection Prevention and Control Program must be based on guidelines prepared by the Society for Health Care Epidemiology of America that requires • identification of colonized or infected patients through active surveillance cultures; • isolation of identified patients in an appropriate manner; and • strict adherence to hand washing and hygiene guidelines.

Uncodified language in the bill requires DHMH, by December 1, 2008, to report to specified standing committees on legislative recommendations to develop the reporting system.

**Current Law:** The Patients' Safety Act of 2001 (Chapter 318 of 2001) required the Maryland Health Care Commission, in consultation with DHMH, to study the feasibility of developing a system for reducing the incidence of preventable adverse medical events in the State, including a reporting system. There is no requirement to report the types of antibiotic-resistant strains of bacteria required by the bill.

**Background:** *Staphylococcus aureus* is a leading cause of bloodstream and other invasive infections. MRSA is bacteria that are resistant to certain antibiotics. Staph infections, including MRSA, occur most frequently among people in hospitals and health care facilities (such as nursing homes and dialysis centers) who have weakened immune systems. Invasive MRSA infections occur in approximately 94,000 persons nationally each year and are associated with approximately 19,000 deaths. Of these infections, about 86% are health care-associated and 14% are community-associated.

VRE infections most often occur in hospitals. Enterococci are bacteria normally present in the human intestines and female genital tract and are often found in the environment, but can cause infections. Vancomycin is an antibiotic often used to treat enterococci infections; however, enterococci are becoming increasingly drug-resistant. VRE was not reported in U.S. hospitals until 1989. Data reported to the Centers for Disease Control and Prevention in 2004 showed that VRE caused about one of every three infections in hospital intensive care units.

South Carolina requires public reporting of hospital-acquired infections, including MRSA bloodstream infections collected more than 48 hours after hospital admission.

**State Fiscal Effect:** Approximately 238 nursing homes and 68 hospitals would be required to report to DHMH under the bill. DHMH general fund expenditures could

increase by \$322,339 in fiscal 2009, which accounts for a 90-day start-up delay. This estimate reflects the cost of one grade 20 computer network specialist, one grade 19 nurse administrator, one grade 18 data base specialist, two grade 17 epidemiologists, and one grade 8 office secretary to collect, enter, maintain, and analyze the reported data and compile it for required reports. The Community and Family Health Administration would need to purchase and pay an annual maintenance fee for software to collect data from hospitals and nursing facilities. This estimate includes salaries, fringe benefits, one-time start-up costs, and ongoing operating expenses.

Positions	6
Salaries and Fringe Benefits	\$288,289
Operating Expenses	26,550
Software Expenses	<u>7,500</u>
<b>Total FY 2009 State Expenditures</b>	<b>\$322,339</b>

Future year expenditures reflect: • annualization; • full salaries with 4.4% annual increases and 3% employee turnover; • 2% annual increases in ongoing operating expenses; and • ongoing contractual expenses for software maintenance.

---

### Additional Information

**Prior Introductions:** An identical bill was introduced in the 2007 session as SB 837. The bill received an unfavorable report from the Senate Finance Committee. Two identical bills (SB 535 and HB 966) were introduced in the 2006 session. The bills received unfavorable reports from the Senate Finance Committee and the House Health and Government Operations Committee, respectively.

**Cross File:** None.
