Preamble

WHEREAS, Advancement of public policy objectives like Smart and Sustainable Growth are helped by the application and analysis of broadly accepted and reliable information about land use goals, indicators, trends, forecasts, and metrics; and

WHEREAS, Despite its critical importance, limited comprehensive quantitative information exists to measure how Maryland is growing at the State, regional, and, at times, local levels. While some measures and indicators exist statewide, additional ones are needed; and

WHEREAS, BayStat is charged with tracking and assessing the progress of governmental programs to improve the health of the Chesapeake Bay, tracking and assessing the enforcement of laws and regulations to curb the pollution of the Chesapeake Bay, providing a forum for the exchange and continuous analysis of data that will generate new insights for cleaning up the Chesapeake Bay, and identifying and making recommendations for the establishment of measurable goals in the process of Chesapeake Bay restoration; and

WHEREAS, The National Center for Smart Growth Research and Education at the University of Maryland College Park was established to provide leadership and State assistance through research, education, and service on issues pertinent to Smart Growth and is a repository for State, local, and comparative national data on land use issues and regularly collects data from the State, local governments, other states, the federal government, and the private sector; and

WHEREAS, Better quantitative information about land use goals, indicators, trends, forecasts, and metrics will assist the State and local governments in their efforts to provide accurate and timely data to the public and policymakers for informational purposes and tracking efforts at BayStat about the efficacy and cost-effectiveness of governmental programs to restore the vitality of the Chesapeake Bay and growth and development patterns; and

WHEREAS, Some indicators or measures are more appropriately collected by the State and some indicators should be collected by local governments; and

WHEREAS, Since 1970, Article 66B, § 3.09 of the Code has required an annual report for all local governments with planning authority except for charter counties; and

WHEREAS, The Task Force on the Future for Growth and Development recommended that the Department of Planning work with local governments and other stakeholders, including the Task Force itself, to jointly develop a set of Smart and Sustainable Growth indicators that can be used at the local, regional, and State levels; now, therefore,
