2010 Session

FISCAL AND POLICY NOTE

House Bill 1430
Ways and Means

(Delegate Walker, *et al.*)

Student Health and Fitness Act

This bill requires all public school students in kindergarten through grade five to be provided daily programs of physical activity totaling 150 minutes per week, including a minimum of 90 minutes per week of physical education. For any of the required minutes not spent in physical education, each elementary school must designate a physical education leadership team to plan and coordinate opportunities for activities to make up the remaining time. As applicable, a student's program of physical activity must be consistent with the student's individualized education plan. The State Board of Education must adopt regulations necessary to implement the bill.

The bill takes effect October 1, 2010, but a school system may apply for an extension until July 1, 2013. A school system that is granted an extension must have a plan to ensure compliance by July 1, 2013.

Fiscal Summary

State Effect: Any additional monitoring of local school systems' physical education programs by the Maryland State Department of Education (MSDE) can be accomplished with existing personnel and resources. Teacher retirement expenditures increase an estimated \$2.7 million by FY 2016, but potentially as early as FY 2013. Future year expenditures reflect annualization and inflation.

Local Effect: Local school expenditures increase by an estimated \$20.5 million by FY 2014 (and potentially as early as FY 2011) to hire additional physical education teachers for elementary schools. In addition, local school systems may need to lengthen the school day or spend less time on other subjects to provide additional time for physical education and physical activity. **This bill imposes a mandate on a unit of local government.**

Small Business Effect: None.

Analysis

Current Law: Every public school must have a program of physical education that is given in a planned and sequential manner to all students in order to develop their good health and physical fitness and improve their motor coordination and physical skills. However, the specific curriculum and course of study is set by each local board of education.

Maryland regulations require physical education instructional programs to explain how regular, moderate-to-vigorous physical activity contributes to personal health and enhances cognitive and physical performance on a variety of academic, recreational, and life tasks.

Background: The National Conference of State Legislatures (NCSL) reports that, over the last 30 years, the percentage of children who are overweight has more than quadrupled for children ages 6 to 11 and more than tripled for youths ages 12 to 19. NCSL also reports that, in addition to reducing the risk of chronic disease, exercise helps academic performance, contributes to healthy physical development, and reduces the risk for depression. The National Parent-Teacher Association (PTA) has adopted a resolution that urges local PTAs “to support daily physical education programs as an integral part of children’s education.”

MSDE advises that physical education programs in the 24 local school systems vary widely. For example, some elementary schools provide just 30 minutes of physical education per week, while a small percentage of public elementary schools in Maryland may provide as much as 120 or 125 minutes per week. The minimum and maximum amounts of time in physical education for elementary schools in each school system are shown in **Exhibit 1**.

Exhibit 1
Minimum and Maximum Minutes in Physical Education
As of October 2009

<u>School System</u>	<u>Elementary Schools</u>

State Expenditures: Teachers' retirement costs are paid by the State based on local school system salaries from the second prior fiscal year. If additional teachers are hired to teach physical education in fiscal 2011, teachers' retirement expenses will increase

beginning in fiscal 2013. However, if all local school systems take full advantage of the waiver provisions, costs do not increase until fiscal 2016. Thus, as estimated in the Local Expenditures section below, the teacher salary base may increase by as much as \$20.5 million annually in fiscal 2011 but definitely by fiscal 2014 thus, increasing State-paid retirement costs by \$2.7 million beginning as early as fiscal 2013 and definitely by fiscal 2016.

Local Expenditures: The bill's impact on local school systems will depend on current physical education policies, which are determined by the local boards of education. The most significant impact will be on school systems that require less than 90 minutes of physical education per week for elementary school students, because those school systems may need to hire additional physical education teachers to teach the additional classes. Cross-referencing the elementary school data shown in Exhibit 1 with data on the number of elementary schools in each system, it is estimated that one additional physical education teacher may be needed in 248 elementary schools around the State in order to meet the 90-minute minimum established in the bill. Estimating the average fiscal 2011 cost per teacher at \$82,800 (salary and benefits), the total expenditure increase for local school systems amounts to an estimated \$20.5 million. While the bill allows school systems to apply for three-year waivers from the requirements, the additional costs will have to be phased in by fiscal 2014. Still, waivers could enable school systems to make adjustments to their budgets and identify the most efficient ways to expand physical education programs.

Elementary school facilities are not expected to be a barrier to requiring 90 minutes per week of physical education; however, one county reports that it is concerned about providing sufficient time for physical activity when recess is held indoors due to inclement weather.

To provide elementary school students with additional time for physical activity, less time may be spent on other priorities, such as instruction in other subjects. It is assumed that this will not affect school finances, although the impact on students is unknown. Alternatively, school systems could lengthen the school day for elementary school students. The cost of lengthening the school day cannot be accurately determined.

Additional Information

Prior Introductions: SB 955 and HB 503 of 2008 as introduced were similar. SB 955 became Chapter 473 of 2008.

Cross File: None.
