Maryland General Assembly 2010 Session

#### FISCAL AND POLICY NOTE

Senate Bill 232

(Senator Brinkley, et al.)

**Budget and Taxation** 

#### **Property Tax - Homestead Tax Credit - Extension to Second Property**

This bill extends the homestead property tax credit to a homeowner's second dwelling if the second dwelling is at least 90 miles away from the first dwelling receiving the homestead property tax credit, and the homeowner satisfies all other eligibility criteria.

The bill takes effect June 1, 2010, and applies to all taxable years beginning after June 30, 2010.

# **Fiscal Summary**

**State Effect:** Potential significant decrease in special fund revenues beginning in FY 2011 to the extent there are second homes eligible for the homestead property tax credit. This decrease will require either (1) an increase in the State property tax rate; or (2) a general fund appropriation to cover debt service on the State's general obligation bonds.

**Local Effect:** Local government property tax revenues may decrease by a significant amount beginning in FY 2011 to the extent there are second homes eligible for the homestead property tax credit. Expenditures are not affected.

Small Business Effect: None.

# **Analysis**

**Current Law:** An eligible dwelling for purposes of qualifying for a homestead property tax credit is defined as a house that is used as the principal residence of the homeowner and actually occupied or expected to be actually occupied by the homeowner for more

than 6 months of a 12-month period beginning with the date of finality for the taxable year for which the homestead property tax credit is sought. It includes the lot on which the house is erected. A homeowner may only claim the homestead property tax credit for one dwelling.

**Background:** The homestead tax credit program (assessment caps) provides tax credits against State, county, and municipal real property taxes for owner-occupied residential properties for the amount of real property taxes resulting from an annual assessment increase that exceeds a certain percentage or "cap" in any given year. The State requires the cap on assessment increases to be set at 10% for State property tax purposes; however, local governments have the authority to lower the cap.

A majority of local subdivisions have assessment caps below 10%: 19 counties in fiscal 2009 and 20 counties in fiscal 2010 and fiscal 2011. **Exhibit 1** lists the assessment caps for each county. Due to the continuing changes in property assessments, two counties – Harford and Prince George's lowered their assessment cap for tax fiscal 2011. The homestead tax credit program has provided significant local property tax relief in recent years. In fiscal 2010, assessment caps reduced the amount of the county assessable base that is taxable by almost 17%. The corresponding foregone revenue is estimated at \$1.4 billion.

The homestead tax credit program is administered as follows:

- Increases in property assessments are equally spread out over three years. For example, if a property's assessment increased by \$120,000, from \$300,000 to \$420,000, the increase would be phased in through increments of \$40,000 annually for the next three years.
- If the assessment cap was set at 10%, however, the amount of assessment subject to taxes would increase by only \$30,000 in the first year, \$33,000 in the following year, and \$36,300 in the third year.
- Since the assessment cap was set lower than the actual market increase, the homeowner does not have to pay taxes on the property's full assessed value.

#### Application Process for Homestead Tax Credit Program

Homeowners are required to file a specified application with the State Department of Assessments and Taxation (SDAT) to qualify for the homestead property tax credit program. Homeowners must file an application within 180 days following the date the property transfers to a new owner. For property transfers that occurred prior to December 31, 2007, an application must be filed with SDAT by December 31, 2012.

Source: State Department of Assessments and Taxation

The first 476,000 homestead tax credit applications were sent out to Maryland homeowners with the annual assessment notices in December 2007, and an additional 28,819 were sent to new purchasers of residential property during calendar 2008. SDAT sent out 471,068 assessment notices along with the application for calendar 2009. It is expected that 471,068 will be mailed out for calendar 2010.

SDAT reports that it processed 281,782 applications sent out for 2008, including 103,278 that were submitted electronically via the department's web site. Of the

applications sent out for 2009, SDAT had received 286,227 (as of December 9, 2009) and processed 187,915. Of this amount, 91,258 applications were submitted electronically.

SDAT reports that audits of applications sent out and received for the period of January 1, 2008 through December 9, 2009, has resulted in the removal of 6,207 homestead tax credits. This has resulted in an increase of \$826,090 in State property tax revenue and approximately \$14.8 million in local property tax revenue.

### Annuity Bond Fund

Debt service payments on the State's general obligation bonds are paid from the Annuity Bond Fund. Revenue sources for the fund include State property taxes, premium from bond sales, and repayments from certain State agencies, subdivisions, and private organizations. General funds may be appropriated directly to the Annuity Bond Fund to make up any differences between the debt service payments and funds available from property taxes and other sources. The proposed fiscal 2011 State budget includes \$833.4 million for general obligation debt service costs, all of which are special funds from the Annuity Bond Fund.

To offset the reduction in State property tax revenues, general fund expenditures could increase in an amount equal to the decrease in the Annuity Bond Fund revenues or the State property tax rate would have to be increased in order to meet debt service payments. This assumes that the Annuity Bond Fund does not have an adequate fund balance to cover the reduction in State property tax revenues.

**State Fiscal Effect:** State special fund revenues may decrease by a significant amount beginning in fiscal 2011. The amount depends on the number of eligible homeowners who own a second home, the assessed value of each second home, and annual assessment increases. The estimated average homestead property tax credit for fiscal 2011 is \$42,040 for State property tax purposes and \$86,833 for county property tax purposes.

As a point of reference, **Exhibit 2** shows the effect on State and local property tax revenues of one homeowner in each county qualifying for an additional homestead property tax credit, based on fiscal 2011 average assessments and average homestead property tax credits, and fiscal 2010 tax rates.

<b>County Revenues</b>	\$334,520	\$86,883		(\$15,742)
<b>State Revenues</b>				(\$1,014)

**Local Fiscal Effect:** County and municipal property tax revenues may decrease by a significant amount, beginning in fiscal 2011. The amount, which cannot be quantified at this time, depends on the number of eligible homeowners who own a second home, the assessed value of each second home, annual assessment increases, and the local government's property tax rate. As shown in **Exhibit 3**, approximately 60.5% of improved residential property accounts are expected to receive a county homestead tax credit in fiscal 2011. Pursuant to this legislation, a sizeable amount of additional properties may be eligible for a homestead tax credit. In addition, several counties with a significant number of vacation homes, most notably Worcester and Garrett counties could be disproportionately impacted by the bill. For fiscal 2011, only 24% of residential property accounts in Worcester County are expected to receive a homestead tax credit, whereas 44% of residential property accounts in Garrett County are expected to receive a homestead tax credit.
