10. Description and Purpose of Grantee Organization (Limit Length to Visible area)				
<p>The Montgomery County Department of Parks is a key agency of the Maryland-National Capital Park and Planning Commission (M-NCPPC), the proud steward of over 34,000 acres of parkland. Our mission is to protect and interpret the county's valuable natural and cultural resources; balance the demand for recreation with the need for conservation; offer a variety of enjoyable recreational activities that encourage healthy lifestyles; and provide clean, safe, and accessible places for leisure-time activities.</p> <p>The Department's Cultural Resources program exists to preserve and interpret the historical buildings and archaeological sites on parkland that best indicate the history of Montgomery County's rich heritage. The Warner Manor project supports the goals of the Department by creating a countywide public park with a pair of historic, interpreted buildings and public archaeological lab at its core, surrounding by a landscaped open space park.</p>				

11. Description and Purpose of Project (Limit Length to Visible area)

Warner Manor, located on Carroll Place in the heart of the Kensington Historic District, was the home of Brainard Warner, the founder of the Town of Kensington, Maryland, and a significant figure in the development of Montgomery County. This 4.5-acre property was acquired by M-NCPPC in 2005-2006 through the Legacy Open Space program. Planning and design work for this new park has been underway since 2006 in close coordination with the Town of Kensington and other interested communities. The concept plan for the park, estimated to cost \$5 million when completed, will meet three goals: 1) to create a landscaped open space park that serves as a town green for Kensington and supports countywide events; 2) to provide historical and archaeological interpretation of this important historical site to county citizens; 3) to restore and rehabilitate the historic structures (the main house and carriage house) through adaptive reuse as public meeting space, public archaeology lab, and park staff offices. The project will convert a 13,000 square-foot historic house and carriage house into a working Parks stewardship office and public venue that will serve at least 40 people daily, and a landscaped green that can serve the 1,850 residents of the Town of Kensington and the nearly 1 million county residents through public events.

Round all amounts to the nearest \$1,000. The totals in Items 12 (Estimated Capital Costs) and 13 (Proposed Funding Sources) must match. The proposed funding sources must not include the value of real property unless an equivalent value is shown under Estimated Capital Costs.

28. Comments: (Limit Length to Visible area)

This project serves to activate very large, vacant historic buildings. It is essential to activate vacant buildings on parkland with appropriate uses to prevent deterioration.

When complete, this site is envisioned to serve all of Montgomery County in several ways: as open space to be programmed for public events, as indoor community public meeting space, as interpreted and functional historical buildings, and as a public educational resource. Further, the Cultural Resources park staff proposed to be housed here are responsible for park planning, natural resource stewardship, and cultural resource stewardship for the entire parks system, thus benefiting the entire county.
