10. Description and Purpose of Grantee Organization (Limit Length to Visible area)				
<p>Meade High School is the largest public school in Anne Arundel County serving 2500+ students. Over 800 of those students participate in athletics. Our athletic mission statement is listed below.</p> <p>Interscholastic athletics can be a fun, rewarding, and memorable part of the high school experience. While academics offer the primary source for formal education, athletics can contribute to the total value of that education in many different ways. Building upon the concepts of teamwork, fair play, sportsmanship, and self esteem, the athletic experience can help to provide for a well rounded educational experience. Athletic participation is a privilege and not a right. To those who strive to succeed in the classroom comes the privilege to compete outside of it.</p>				

11. Description and Purpose of Project (Limit Length to Visible area)

Meade High School is the only public high school in Anne Arundel County that does not have running water and rest rooms at their stadium. The purpose of this project is to construct a building that will have men's and women's rest rooms, concessions, two ticket booths and a storage area. This would allow us to vacate our current concession stand (which is partially condemned) and move it to a much better location. Not only is the current concession area we have outdated, it's also too small and causes crowd control problems when we have events with large crowds.

Since the installation of a turf field at our stadium, we now share our stadium with Recreation and Parks. This building would allow their players, parents, and spectators to have access to rest room facilities as well.

Currently our ticket booth is a shed without electricity. By moving our ticket booths into this building, we will have electricity and access into our stadium will become easier, especially for visitors. Our ticket takers will have an easier time sorting and counting money with proper lighting.

Round all amounts to the nearest \$1,000. The totals in Items 12 (Estimated Capital Costs) and 13 (Proposed Funding Sources) must match. The proposed funding sources must not include the value of real property unless an equivalent value is shown under Estimated Capital Costs.

28. Comments: (Limit Length to Visible area)

We are in desperate need of help to complete this project. I think our school, athletic booster club and AACPS Office of Athletics, have stepped up in raising funds to the best of our ability. In these tough economic times, \$117,000 is a lot of money to raise from one organization. If we do not receive additional help, we will be back to square one because the project will not happen anytime in the near future.

Mr. David Herzog, from Herzog Homes, is the contractor who will be running the project. Between donations that he's received or getting work or materials "at cost", we will be saving approximately \$100,000-\$150,000 thanks to his hard work and generosity. He has been on board with this project from day one (approximately 2 years ago) and if we are not able to move forward, I'm afraid we are going to lose some of the major benefits from having him on board.

In closing, the student-athletes and community at Meade High School deserve to be treated the same as every other public school in the county. By being the only school that does not have outdoor rest rooms at their stadium, we are not. Anything you can do to help us complete this project would be a major boost to our school and community and help everyone here feel as though we are being treated equally. Thank you very much for your consideration.
