11. Description and Purpose of Project (Limit Length to Visible area)

The National Aquarium's Central Exhibit, the Ray Tray, is now thirty years old and has reached the end of its useful life. Conditions in the exhibit dictate that it must be replaced in 2012 or risk catastrophic failure or collapse. The saltwater environment within the Aquarium has caused irreversible damage to the concrete structure of the ray tray and as such immediate replacement is needed. In fact, the ray tray already started collapsing. In 2011, the National Aquarium had to close a portion of the ray tray (the deep dive) because of irreversible damage. Rather than simply replace the ray tray with an exact copy of the current exhibit, the National Aquarium has decided to upgrade this central area to create excitement, drive visitors and ensure the National Aquarium remains a major economic engine in Baltimore. The new exhibit draws inspiration from the Great Barrier Reef and will be an impressive and awe-inspiring entry point into the Aquarium.

In addition to this project, the National Aquarium has a five-year capital plan to update, renovate and replace the infrastructure of the buildings that are all aging and deteriorating. All projects will aid in bringing the facility into compliance with State Codes.

Round all amounts to the nearest \$1,000. The totals in Items 12 (Estimated Capital Costs) and 13 (Proposed Funding Sources) must match. The proposed funding sources must not include the value of real property unless an equivalent value is shown under Estimated Capital Costs.

28. Comments: (Limit Length to Visible area)
The National Aquarium's Ray Tray Renovation (Shark Lagoon) is part of a larger \$75 million
capital plan to make necessary improvements to ensure the National Aquarium remains an
economic engine for the State of Maryland. While the Ray Tray is an urgent and necessary step, we
have critical needs which need to be addressed in the coming years.
nave envious needs white need to be additioned in the comming joins.
