11. Description and Purpose of Project (Limit Length to Visible area)

Friends Aware, Inc seeks to upgrade its current facility. The main, and overriding, goal is to bring the facility up to full compliance with ADA requirements, including bathrooms, hallways, and entrances. The building does not currently have a sprinkler system. Many of our individuals require extra time to enter or exit our buses, often due the fact they are wheelchair bound, and are subject to the weather as they access their transportation. Therefore, they are in need of a covered entry into the building from our buses. The current traffic flow and pattern presents a safety issue for our transportation and contract work programs. In addition, building access for emergency services personnel is compromised. Due to lack of available office space, a portion of the administrative staff are housed in an off-site rental space. Handicapped accessible parking is extremely limited. The growth of the square footage of the agency is a reflection of the need for larger hallways, handicap-accessible bathrooms, and office space to accommodate off-site administrative team members.
