**11. Description and Purpose of Project** (Limit Length to Visible area)

Funds for the Chesapeake Grove project will be used to finance infrastructure and pre-construction costs of a 10 acre multi-phase senior citizen housing and community intergenerational center project, located in the City of Cambridge. The Intergenerational Center will be the first phase of the build out and the centerpiece around which housing focused towards seniors will be constructed. The center is modeled from the St. Ann's Center of Milwaukee WI which was established in the early 1980s combining a facility that encourages cooperative services and opportunities in child care, seniors, and individuals with disabilities. The Intergenerational Center will be the only of its kind in our region of Delmarva and a great asset to the Dorchester County community. The housing proposed for the project includes three large apartment complexes consisting of 28-30 units each, two 14 unit assisted living buildings. There are currently no formal assisted living opportunities in Dorchester County. The project will also benefit the community by providing additional employment and workforce training opportunities. The project will add approximately 50,000 sf of program space, add approximately 60 new jobs, add approximately 150 construction jobs in an area with little to no current development activity.

**28. Comments: (Limit Length to Visible area)**

Dorchester County, Maryland is a historically economically distressed area on Maryland's Eastern Shore, with a growing number of vulnerable individuals and families not helped by the decline in industry and employment opportunities over the last 50-30 years that has accelerated most recently. An emerging trend over the past 10-15 years includes the growing number of seniors aging in place or retiring in the area some of whom requiring a higher level of support. This project will fill a much needed gap in facility/services for the current population and also for future residents seeking retirement in the area with more urban expectations in terms of the quality of programming and facilities available to the public. With the addition of adding child care day services, complimentary programming will be developed to help provide mutually beneficial personal interaction that stimulates mental and physical health and well being. This model is based on an established and proven intergenerational example including the St. Ann's Intergenerational Center in Milwaukee, WI and which as been repeated in several other cities throughout the country. This project will be one of few in our Mid-Atlantic area and a significant addition to the Eastern Shore region. The Intergenerational Center is envisioned to be a community center also open to the broader community for family activities. Skilled employment positions will be added such as nursing, physical rehabilitative and therapeutic opportunities, health / wellness and recreation positions, specialists in childcare and disability services. Other opportunities will be created for workforce training in cooperation with area schools and community programs, employment opportunities for area youth, and additional grounds maintenance support is anticipated in the new employment count. The focus of DCS housing efforts at Chesapeake Grove are to help support individuals with disabilities live independently, support seniors currently living in substandard homes, and attract seniors who may be looking to downsize and be located close to integrated community services which would be accessible on site. DCS currently holds a permit to develop a 10 acre area with site preparation, stormwater management, and installation of infrastructure being completed in the Spring / early Summer 2015. The project has been reviewed by the City of Cambridge Planning and Zoning Dept / commission and we anticipate final permit review this Spring 2015. We anticipate that once complete with all its features, the Chesapeake Grove campus will be a place dedicated to Dorchester County, but also one that serves the needs of many of our regional residents. It will feature a unique and innovative programmed campus not duplicated anywhere else, which the State of Maryland will be proud of.
