House Bill 114
Ways and Means

(Delegate Tarlau, *et al.*)

Homeowners' Property Tax Credit - Calculation and Eligibility

This bill alters the calculation and eligibility of the Homeowners' Property Tax Credit Program by (1) increasing the combined net worth of a homeowner from \$200,000 to \$400,000; (2) increasing the combined gross income from \$60,000 to \$70,000 beginning January 1, 2018, and to \$80,000 beginning January 1, 2019; and (3) reducing from 9% to 7.5% the percentage applied to combined income over \$16,000 when calculating the property tax credit.

The bill takes effect June 1, 2016, except for several provisions that take effect January 1, 2017.

Fiscal Summary

State Effect: General fund expenditures increase by approximately \$6.3 million beginning in FY 2018. If the number of program recipients increases by 10%, general fund expenditures will increase by an additional \$7.5 million annually. Revenues are not affected.

Local Effect: County and municipal expenditures for the supplemental homeowners' property tax credits decrease by approximately \$2.3 million annually beginning in FY 2018. Local revenues are not affected.

Small Business Effect: None.

Analysis

Current Law: The maximum assessment against which the Homeowners' Property Tax Credit may be granted is \$300,000. To be eligible for the tax credit, a homeowner's combined net worth may not exceed \$200,000 and combined income may not exceed \$60,000. The percentages applied to the combined income that are used to calculate the amount of the property tax credit are (1) 0% of the first \$8,000 of combined income; (2) 4% of the next \$4,000 of combined income; (3) 6.5% of the next \$4,000 of combined income; and (4) 9% of the combined income over \$16,000.

Background: The Homeowners' Property Tax Credit Program (Circuit Breaker) is a State-funded program (*i.e.*, the State reimburses local governments) providing credits against State and local real property taxation for homeowners who qualify based on a sliding scale of property tax liability and income. **Exhibit 1** shows the number of individuals qualifying for the tax credit and the total cost of the program since fiscal 2005, as referenced in the State budget.

Exhibit 1 Homeowners' Property Tax Credit Program Fiscal 2005-2017

<u>Fiscal Year</u>	<u>Eligible Applications</u>	<u>State Funding</u>	<u>Average Credit Amount</u>
2005 Actual	48,666	\$39.5 million	\$812
2006 Actual	46,628	41.7 million	894
2007 Actual	48,290	45.6 million	944
2008 Actual	46,618	45.2 million	970
2009 Actual	47,781	50.3 million	1,053
2010 Actual	48,737	53.4 million	1,096
2011 Actual	49,224	55.8 million	1,134
2012 Actual	52,594	62.6 million	1,190
2013 Actual	53,196	62.6 million	1,177
2014 Actual	50,872	61.6 million	1,218
2015 Actual	48,713	59.5 million	1,221
2016 Estimated	53,800	61.6 million	1,171
2017 Estimated	55,855	63.3 million	1,205

Chapter 27 of 2006 made several significant changes to the Homeowners' Property Tax Credit Program: the maximum assessment against which the credit may be granted was increased to \$300,000 from \$150,000, and the percentages used to determine the amount of the tax credit were altered.

Chapter 588 of 2005 altered the calculation of total real property tax for the Homeowners' Property Tax Credit Program by subtracting the homestead tax credit amount from the total assessment rather than the maximum assessment specified under the credit. Chapter 588 also specified additional eligibility criteria for the local supplement to the Homeowners' Property Tax Credit Program by authorizing a local jurisdiction to alter the \$200,000 limitation on a homeowner's net worth for eligibility for a local supplement to the Homeowners' Property Tax Credit Program.

Since fiscal 1992, the counties and Baltimore City have been authorized to grant a local supplement to the Homeowners' Property Tax Credit Program. The State Department of Assessments and Taxation (SDAT) administers a local supplement granted by a county, but the cost of a local supplement is borne by the local government. For purposes of the local supplement, the counties are authorized to alter the maximum on the assessed value taken into account in calculating the credit, as well as the percentages and income levels specified in the tax limit formula. The counties are also authorized to impose limitations on eligibility for a local supplement in addition to the requirements specified for the State credit. Thirteen counties – Anne Arundel, Baltimore, Calvert, Caroline, Carroll, Charles, Frederick, Garrett, Harford, Howard, Kent, Montgomery, and Washington – have a local homeowners' property tax credit supplement program that is administered by SDAT.

Municipalities are also authorized to provide a supplement to the Homeowners' Property Tax Credit Program. Under the enabling authority for municipalities, a municipal supplement is limited to 50% of the State credit.

Chapter 444 of 2006 altered the calculation and eligibility criteria of the municipal supplement to make it consistent with the current calculation and eligibility criteria authorized under the county supplement program. Chapter 444 also altered the amount of a supplemental municipal credit that may be granted by repealing the limitation that a municipal supplement may not exceed 50% of the Homeowners' Property Tax Credit. SDAT administers municipal homeowners' property tax credit supplement programs in the cities of Gaithersburg, Rockville, Bowie, College Park, Greenbelt, Hyattsville, and Mount Rainier.

State Fiscal Effect: The bill alters the calculation and eligibility of the Homeowners' Property Tax Credit Program. As a result, general fund expenditures increase by at least \$6.3 million beginning in fiscal 2018. This results in an average credit increase of \$112 for current recipients. Assuming an annual growth rate of 2.75%, expenditures will

increase to approximately \$7.0 million by fiscal 2022. This estimate is based on current program recipients and a comparison to recent applicants who were denied due to having a combined gross income over the \$60,000 threshold allowed under current law as well as the new calculation formula. The estimate does not include the increase in program recipients from the higher maximum net worth amount provided under the bill as SDAT does not have access to that information.

As a point of reference and for illustrative purposes only, if the increase in combined net worth to \$400,000 increases program recipients by 10%, general fund expenditures increase by an additional \$7.5 million, which increases the cost of the bill to approximately \$13.8 million beginning in fiscal 2018.

Local Fiscal Effect: County and municipal expenditures for the supplemental homeowners' property tax credit programs decrease by approximately \$2.3 million annually beginning in fiscal 2018. Local expenditures for supplemental programs decrease as the amount of the State tax credit increases.
