Senate Bill 195

(Senator Pinsky, *et al.*)

Budget and Taxation

Business Relief and Tax Fairness Act of 2018

This bill requires affiliated corporations to compute Maryland taxable income using combined reporting. The bill also eliminates the annual filing fee for specified annual reports for a corporation or business entity with 10 or fewer employees. **The bill takes effect July 1, 2018, with the combined reporting provisions applicable to tax year 2019 and beyond.**

Fiscal Summary

State Effect: General fund revenues increase by \$18.0 million in FY 2019 from additional corporate income tax revenues, offset by general fund revenue losses of \$84.2 million from the elimination of filing fees for specified entities. Transportation Trust Fund (TTF) revenues increase by \$3.3 million and Higher Education Investment Fund (HEIF) revenues increase by \$1.4 million in FY 2019. General fund expenditures increase by at least \$2.0 million in FY 2019 and \$0.3 million in FY 2023.

(\$ in millions)	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023
GF Revenue	(\$66.2)	(\$22.0)	(\$18.1)	(\$23.3)	(\$21.7)
SF Revenue	\$4.7	\$16.6	\$18.0	\$17.1	\$18.0
GF Expenditure	\$2.0	\$0.4	\$0.3	\$0.3	\$0.3
Net Effect	(\$63.5)	(\$5.8)	(\$0.4)	(\$6.4)	(\$3.9)

Note: () = decrease; GF = general funds; FF = federal funds; SF = special funds; - = indeterminate increase; (-) = indeterminate decrease

Local Effect: Local highway user revenues distributed from the corporate income tax increase by \$0.3 million in FY 2019 and by \$1.2 million in FY 2023. Local expenditures are not affected.

Small Business Effect: Potentially meaningful.

Analysis

Bill Summary: The bill requires affiliated corporations to compute Maryland taxable income using “combined reporting.” The Comptroller is required to adopt regulations to carry out the combined reporting provisions of the bill, and the regulations must be consistent with the principles for determining the existence of a unitary business adopted by the Multistate Tax Commission.

Combined groups are required to file “combined income tax returns,” except as provided by regulations. A corporation that is a member of a combined group must compute its Maryland taxable income using the combined reporting method (1) taking into account the combined income of all members of the combined group; (2) apportioning the combined income to Maryland using the combined factors of all members of the combined group; and (3) allocating the apportioned income among the members of the group that are subject to the Maryland income tax. The bill provides that, subject to regulations issued by the Comptroller, corporations may elect to use the “water’s edge method,” essentially including only corporations incorporated in the United States and specified others (those generally having significant U.S. presence) in the combined group for combined filing purposes.

The Comptroller must report to the General Assembly by March 31 of each year on an estimate of the total additional tax revenue from corporations, if any, which will be collected in the next fiscal year as a result of using the combined reporting method.

Additionally, the bill eliminates the filing fee collected by the State Department of Assessments and Taxation (SDAT) for a corporation or business entity with 10 or fewer employees for the following reports:

- annual report of a Maryland corporation, except a charitable or benevolent institution, nonstock corporation, savings and loan corporation, credit union, family farm, and bank institution;
- annual report of a foreign corporation subject to the jurisdiction of the State, except a national banking association, savings and loan association, credit union, nonstock corporation, and charitable and benevolent institution;
- annual report of a Maryland savings and loan association, banking institution, or credit union, or of a foreign savings and loan association, national banking association, or credit union that is subject to the State’s jurisdiction;
- annual report of a Maryland limited liability company, limited liability partnership, limited partnership, or of a foreign limited liability company, foreign limited liability partnership, or foreign limited partnership, except a family farm;
- annual report of a business trust;

- annual report of a real estate investment trust or foreign statutory trust doing business in the State; and
- annual report of a family farm.

Current Law: A corporate income tax rate of 8.25% is applied to a corporation's Maryland taxable income. In general, the Maryland corporate income tax is computed using federal provisions to determine income and deductions. Maryland is a "unitary business" State, in that a corporation is required to allocate all of its Maryland income (that portion that is "derived from or reasonably attributable to its trade or business in the State") attributable to the corporation's "unitary business." Essentially, a unitary business exists when the operations of the business in various locations or divisions or through related members of a corporate group are interrelated to and interdependent on each other to such an extent that it is reasonable to treat the business as a single business for tax purposes, and it is not practicable to accurately reflect the income of the various locations, divisions, or related members of a corporate group by separate accounting.

Under Maryland law, however, the application of the unitary business principle is limited in the case of affiliated groups of related corporations because of the requirement that each separate corporation must file a separate income tax return and determine its own taxable income on a separate basis. For a multi-corporate group, the unitary business principle is restricted to consider only the isolated income and business activities of each separate legal entity. Even though the activities of related corporations may constitute a single unitary business, the affiliated corporations that lack nexus with the State (or are protected from taxation by federal law) are not subject to the corporate income tax, and neither the net income nor the apportionment factors of those affiliated corporations are taken into account on the corporate income tax return of any related corporation that is subject to the tax.

Filing Fees

At the beginning of each calendar year, SDAT mails a personal property tax return to most businesses on record. Businesses must file the return by April 15, reporting personal property located in Maryland on January 1, the "date of finality." The date of finality is the date used to determine ownership, location, value, and liability for tax purposes. An annual report fee is required to be paid to SDAT with the personal property tax return. The annual report fee is for the privilege of maintaining the legal entity's existence in the State. The fee is typically \$300. Chapters 323 and 324 of 2016 waive the annual filing fee collected by SDAT for a corporation or business entity that participates in the Maryland Small Business Retirement Savings Program or otherwise offers a retirement savings arrangement for its employees.

Background:

Maryland's Corporate Income Tax

Every Maryland corporation and every corporation that conducts business within Maryland, including public service companies and financial institutions, are required to pay the corporate income tax. The tax base is the portion of federal taxable income, as determined for federal income tax purposes and adjusted for certain Maryland addition and subtraction modifications, that is allocable to Maryland. Federal taxable income for this purpose is the difference between total federal income and total federal deductions (including any special deductions). The next step is to calculate a corporation's Maryland taxable income. The Maryland taxable income of a corporation that operates wholly within the State is equal to its Maryland modified income. Corporations engaged in multistate operations are required to determine the portion of their modified income attributable to Maryland, based on the amount of their trade or business carried out in Maryland. Corporations are generally required to use either a three-factor apportionment formula of payroll, property, and sales, with sales double weighted or, in the case of a manufacturing corporation, a single sales factor formula. The apportionment factor is then multiplied by the corporation's modified income to determine Maryland taxable income. The Maryland tax liability of a corporation equals the Maryland taxable income multiplied by the tax rate, less any tax credits.

Combined Reporting

As **Exhibit 1** shows, approximately half of the states and the District of Columbia currently require some form of combined reporting. The other states, including Maryland, allow or require that taxes on income be computed on the basis of the books and records of separate corporate entities without regard to the fact that the entity may be a member of a commonly owned and controlled group of entities functioning as a single business.

Comptroller's Analysis of Combined Reporting

The Comptroller's Office issued its most recent analysis of the revenue impact of combined reporting in March 2013, including an initial analysis of the impact combined reporting would have had on corporate income tax returns filed in tax year 2010. The Comptroller's Office estimated the impact under two different methods of apportioning the income of a combined group to Maryland (known as "Joyce" and "Finnegan") and concluded that the specific method employed could alter the estimated revenue impacts. Under both methods, the denominator of the apportionment factor is based on the total payroll, property, and sales of all members of the unitary group, regardless of whether they are subject to Maryland's corporate income tax (have nexus with Maryland). Under the Joyce method of apportionment, the numerator consists of the payroll, property, and sales of all of the entities in the group with nexus. The Finnegan method apportions the payroll, property, and sales of all entities with nexus with Maryland as well as the payroll, property, and sales of companies that make sales into the State.

The Comptroller's Office estimates that the Joyce method of apportionment would have decreased corporate income tax revenues in tax year 2010 by about \$4.5 million, and revenues would have increased by \$30.1 million under Finnegan. About 65% of the revenues that would have been generated under Finnegan in tax year 2010 were attributable to corporations in the retail trade and accommodation and food services industries.

Tax year 2010 data shows that the total tax liabilities for health care and social assistance, transportation and warehousing, and utility industries would have been almost

\$40.9 million lower under Joyce, while the retail, professional, scientific, and technical services and administrative support, waste management, and remediation services industries would have paid about \$37.7 million more in tax. It should be noted that even within industries with a significant change in total tax liabilities, the change was not uniform for all corporations. For example, in tax year 2010, under Finnegan, 32% of corporations would have had a tax decrease, 40% a tax increase, and 28% would have had no change. **Exhibit 2** shows the corporate income tax revenues under the Finnegan and Joyce methods from tax year 2006 through 2010.

State Revenues: In 2017, SDAT collected \$89.3 million from the annual report filing fee, which is estimated to grow to approximately \$93.6 million by fiscal 2019. SDAT does not collect information on employee size, but by eliminating the filing fee for businesses with 10 or fewer employees, the Department of Legislative Services (DLS) estimates that 90% of businesses that currently pay a filing fee would be exempt. Therefore, general fund revenues decrease by \$84.2 million in fiscal 2019. Future year revenue losses reflect 2% growth. Once the Maryland Small Business Retirement Savings Program is implemented, which eliminates the filing fee for businesses that provide retirement savings arrangements for their employees, a substantial number of these businesses will already have their filing fee waived so the actual decrease in revenue loss will be less.

The bill requires combined reporting using the Finnegan method beginning in tax year 2019. As a result, general fund revenues increase by \$18.0 million, TTF revenues

SB 195/ Page 6

increase by \$3.3 million, of which \$3.0 million goes to the State, and HEIF revenues increase by \$1.4 million in fiscal 2019. **Exhibit 3** shows the impact of combined reporting in fiscal 2019 through 2023.

Effect of Combined Reporting
Fiscal 2019-2023
(\$ in Millions)

	<u>FY 2019</u>	<u>FY 2020</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>
General Fund	\$18.0	\$63.9	\$69.5	\$66.1	\$69.5
HEIF	1.4	4.8	5.3	5.0	5.3
TTF	3.3	11.7	12.8	12.1	12.8
<i>State</i>	<i>3.0</i>	<i>10.6</i>	<i>11.6</i>	<i>11.0</i>	<i>11.5</i>
<i>Local</i>	<i>0.3</i>	<i>1.1</i>	<i>1.2</i>	<i>1.2</i>	<i>1.2</i>
Total	\$22.7	\$80.4	\$87.6	\$83.2	\$87.5

HEIF: Higher Education Investment Fund

TTF: Transportation Trust Fund

This estimate is based on the Comptroller’s estimate of the average impact of combined reporting in prior tax years, adjusted for subsequent changes in the economy and corporate income tax revenues. The actual impact of combined reporting could vary significantly than estimated based on these variables and the implementation of combined reporting as adopted by regulations. In any given year, corporate revenue could decrease significantly, like in tax year 2009, due to the high level of volatility in combined reporting. In addition, the bill does not alter safe harbor requirements. As a result, the fiscal impact of the bill in fiscal 2019 may be significantly less than estimated and may result in a revenue decrease, although combined reporting is not expected to decrease future tax revenues.

State Expenditures: General fund expenditures increase for SDAT and the Comptroller’s Office as described below.

SDAT

SDAT does not currently track the number of employees that a business has, so eliminating the filing fee for businesses with 10 or fewer employees will require SDAT to begin tracking this information. Thus, general fund expenditures for SDAT increase by \$409,718

in fiscal 2019, which accounts for the bill’s July 1, 2018 effective date. This estimate reflects the cost of hiring two office services clerk to perform data entry, two auditors to audit the number of employees that a business has, and one supervisor to oversee these employees. It includes salaries, fringe benefits, one-time start-up costs, and ongoing operating expenses:

SDAT Positions	5
Salaries and Fringe Benefits	\$262,143
IT System Costs	\$120,000
Operating Expenses	<u>27,575</u>
Total FY 2019 State Expenditures	\$409,718

Future year expenditures reflect full salaries with annual increases and employee turnover and ongoing operating expenses.

Comptroller’s Office

The Comptroller’s Office reports that it will incur additional expenditures beginning in fiscal 2019 in order to implement combined reporting. These expenses include:

- hiring three contractual auditors to handle an expected increase in taxpayer queries beginning in part of fiscal 2019 through one-half of fiscal 2021;
- computer programming expenditures, including processing changes to the SMART income tax return processing and imaging systems and systems testing;
- taxpayer notification expenses; and
- providing training to corporate audit and taxpayer service staff.

Exhibit 4 shows the estimated administrative costs at the Comptroller’s Office in fiscal 2019 through 2021. Additionally, if the Comptroller participates in the Multistate Tax Commission’s income tax audit program, which would require the Comptroller’s Office to provide assessments on audits of multistate businesses, expenditures would increase by \$200,000 annually, but it has the potential to increase revenue by approximately \$1.0 million annually. The Comptroller’s Office can report to the General Assembly on the estimate of additional tax revenue from combined reporting with existing resources, since there is no provision requiring a separate informational filing form for affected corporations.

Exhibit 4
Comptroller's Office Administrative Expenses
Fiscal 2019-2021

	<u>FY 2019</u>	<u>FY 2020</u>	<u>FY 2021</u>
Computer Programming	\$1,000,000	\$0	\$0
Consultants	400,000	0	0
Auditors	89,700	121,600	62,800
Training Expenses	46,300	0	0
Taxpayer Notification	36,900		0
Total Expenses	\$1,572,900	\$121,600	\$62,800

Small Business Effect: Most small businesses are not affiliated corporations so combined reporting has a minimal effect on those businesses. However, small businesses with 10 or fewer employees that file certain annual reports benefit from not paying filing fees of up to \$300 annually. DLS estimates that the bill exempts approximately 285,000 small businesses from paying annual filing fees.

Additional Information

Prior Introductions: Similar bills, SB 357 of 2017, SB 432 of 2016, and SB 179 of 2015, received a hearing in the Senate Budget and Taxation Committee, but no further action was taken. The cross files, HB 615 of 2017, HB 812 of 2016, and HB 663 of 2015, received a hearing in the House Ways and Means Committee, but no further action was taken. In addition, similar bills were introduced in the 2010 through 2014 sessions.

Cross File: None.
