10. Description and Purpose of Organiza						

The mission of the Boy Scouts of America is to prepare young people to make ethical and moral choices over their lifetimes by instilling in them the values of the Scout Oath and Law. SCOUT OATH: On my honor I will do my best to do my duty to God and my country and to obey the Scout Law; to help other people at all times; to keep myself physically strong, mentally awake, and morally straight. SCOUT LAW: A Scout is Trustworthy, Loyal, Helpful, Friendly, Courteous, Kind, Obedient, Cheerful, Thrifty, Brave, Clean, Reverent

11. Description and Purpose of Project (Limit length to visible area)

In 2018, Broad Creek Memorial Scout Reservation celebrated its 70th Anniversary. This anniversary is a significant milestone for the Baltimore Area Council; however it also highlights the fact that the utility infrastructure throughout the Reservation is for the most part 70 years old. The utility distribution systems in camp have exceeded their planned lifespan; their replacement is a critical piece of any capital improvement plan. Specifically, we are requesting funding for two critical components of our master plan: (1) Electrical and Water Utility Upgrades, and (2) Construction of three Comfort Stations featuring single-door access to meet our growing needs for youth and adults, male and female.

Round all amounts to the nearest \$1,000. The totals in Items 12 (Estimated Capital Costs) and 13 (Proposed Funding Sources) must match. The proposed funding sources must not include the value of real property unless an equivalent value is shown under Estimated Capital Costs.

12. Estimated Capital Costs					
Acquisition	\$0				
Design	\$100,000				
Construction	\$2,675,000				
Equipment					
Total	\$2,775,000				
13. Proposed Funding Sources - (List all funding sources and amounts.)					
Private Donors	\$2,275,000				
Government Bonds	\$500,000				
Total	\$2,775,000

28. Comments

Electrical Distribution System: Camp Saffran at Broad Creek is currently served by a primary meter. Consequently, the camp is responsible for all maintenance. Existing lines are frequently in need of repair due to storm damage (i.e. falling trees and branches, breakage due to ice, etc.). The Master Plan Committee's recommendation is to relocate the existing wiring to underground and meter each service point. This approach shifts installation and ongoing maintenance of the delivery system including all wiring, transformers and metering to the local electrical utility.

Water Distribution System: A substantial fraction of the water distribution piping at Camp Saffran is above ground and requires constant maintenance. Moving the water distribution system below ground will eliminate the ongoing freeze/thaw maintenance issues. This relocation can be implemented in a cost-effective manner by dual purposing the trenching required for the electrical lines. An added benefit to a 100% underground water system will be the ability to deliver water to a wider portion of the camp year-round.

Comfort Stations: Scouting has evolved to the point that flush toilets and hot showers are the industry standard for camp accommodations. The question is not whether it is as good as you remember as a kid, but, "Would your spouse stay here today?" In addition, our child protection standards and increasingly co-gender participation make the traditional latrines and open showers inappropriate. As such, convenient access to shower houses with private stalls are a priority for the Reservation. Our master plan calls for three shower houses strategically located throughout the property. The locations have been selected to provide convenient access from clusters of campsites and program areas while minimizing utility and sewer line runs. Estimated cost per comfort station: \$200,000 (total: \$600,000).
