2019 Session

**FISCAL AND POLICY NOTE**  
**Third Reader - Revised**

Senate Bill 421

(Senator Benson, *et al.*)

Budget and Taxation

Ways and Means

---

**Video Lottery Terminals - Minority Business Participation Goals - Enforcement  
and Reporting**

---

This bill extends by one year, to July 1, 2020, the requirement that a video lottery facility applicant or licensee be subject to the minority business enterprise (MBE) participation goal set in State law and any other corresponding MBE provisions. The bill also extends by one year the deadline for the Maryland Department of Transportation (MDOT) to complete a study of the MBE requirement's compliance with federal law, from December 14, 2018, to December 13, 2019. **The bill takes effect June 1, 2019.**

---

**Fiscal Summary**

**State Effect:** No material effect on State operations or finances, as discussed below.

**Local Effect:** No material effect on local government operations or finances.

**Small Business Effect:** Meaningful.

---

**Analysis**

**Current Law:** Through June 30, 2019, for the construction and procurement, including the procurement of equipment and ongoing services, a video lottery operation applicant or a licensee must, at a minimum, meet the same specified minority business participation requirements of a designated unit for minority business participation. If a county in which a video lottery facility will be located has a higher MBE participation goal than the State, an applicant must meet the county's higher standard to the extent possible. A county in which a video lottery facility will be located may impose local business, local minority

business participation, and local hiring requirements to the extent authorized by local law and allowed by the United States Constitution.

The disparity study must evaluate race-neutral programs or other methods that can be used to address the needs of minority investors and minority businesses. The study was to be submitted to the Legislative Policy Committee by December 14, 2018, so that the General Assembly could review the report before the 2019 session, but the study was not completed.

**Background:** For a complete description of the State’s MBE program, please see the **Appendix – Minority Business Enterprise Program.**

Chapter 4 of the 2007 special session, which first required the licensing of video lottery facilities in the State, included a requirement that construction and procurement related to the operation of the facilities meet the same requirements for minority business participation specified for State agencies in State law. That provision was scheduled to terminate July 1, 2011, but was reauthorized until July 1, 2018, by Chapter 507 of 2011.

Chapter 1 of the second special session of 2012 added the provision in current law authorizing counties to impose local business, local MBE participation, and local hiring requirements. It also expanded the application of the MBE requirement to applicants and licensees to include procurement of equipment and ongoing services, which remains in current law. This was done because, with some exceptions, Chapter 1 also required video lottery facilities to own or lease their own video lottery terminals (VLTs), whereas prior to Chapter 1, the facilities had used VLTs owned by the State. The requirement to own or lease their own VLTs was delayed until March 31, 2015, for existing facilities in Anne Arundel and Cecil counties; existing facilities in Allegany and Worcester counties were allowed to apply for permission to own their VLTs, but neither did. Chapter 339 of 2017 requires the facilities in Allegany and Worcester counties to own or lease their own VLTs by March 31, 2020.

**State Expenditures:** MDOT is the certification agency for the MBE program and, therefore, oversees the completion of required disparity studies. MDOT advises that the study is already underway at an estimated cost of about \$100,000, and that the one-year extension does not change the cost or actual timing of the study.

**Small Business Effect:** Small and minority-owned businesses continue to benefit from the one-year extension of the MBE participation requirement for video lottery facilities.

## Additional Information

**Prior Introductions:** None.

## Appendix – Minority Business Enterprise Program

---

The State’s Minority Business Enterprise (MBE) program requires that a statewide goal for MBE contract participation be established biennially through the regulatory process under the Administrative Procedure Act. The biennial statewide MBE goal is established by the Special Secretary for the Governor’s Office of Small, Minority, and Women Business Affairs (GOMA), in consultation with the Secretary of Transportation and the Attorney General. In a year in which there is a delay in establishing the overall goal, the previous year’s goal applies. The Special Secretary is also required to establish biennial guidelines for State procurement units to consider in deciding whether to establish subgoals for different minority groups recognized in statute. In a year in which there is a delay in issuing the guidelines, the previous year’s guidelines apply.

In August 2013, GOMA announced a new statewide goal of 29% MBE participation that applied to fiscal 2014 and 2015; as no new goal has been established, the 29% goal remains in effect for fiscal 2019. GOMA issued subgoal guidelines in July 2011, summarized in **Exhibit 1**, which are also still in effect. The guidelines state that subgoals may be used only when the overall MBE goal for a contract is greater than or equal to the sum of all recommended subgoals for the appropriate industry, plus two. In June 2014, new regulations took effect allowing MBE prime contractors to count their own work for up to 50% of a contract’s MBE goal and up to 100% of any contract subgoal. Previously, certified MBE prime contractors could not count their own participation toward any goal or subgoal on an individual contract, but their participation was counted toward the State’s MBE goal.

---

There are no penalties for agencies that fail to reach the statewide target. Instead, agencies are required to use race-neutral strategies to encourage greater MBE participation in State procurements.

### *History and Rationale of the Minority Business Enterprise Program*

In 1989, the U.S. Supreme Court held in the *City of Richmond v. J.A. Croson Co.* that state or local MBE programs using race-based classifications are subject to strict scrutiny under the equal protection clause of the Fourteenth Amendment to the U.S. Constitution. In addition, the ruling held that an MBE program must demonstrate clear evidence that the program is narrowly tailored to address actual disparities in the marketplace for the jurisdiction that operates the program. As a result, prior to each reauthorization of the State's MBE program, the State conducts a disparity study to determine whether there is continued evidence that MBEs are underutilized in State contracting.

The most recent disparity study was completed in 2017 and serves as the basis for the most recent reauthorization of the MBE program. It found continued and ongoing disparities in the overall annual wages, business earnings, and rates of business formation between nonminority males and minorities and women in Maryland. For instance, average annual wages for African Americans (both men and women) were 37% lower than for comparable nonminority males; average annual wages for nonminority women were 33% lower than for comparable nonminority males. It also found continued disparities in the use of MBEs by the State compared to their availability in the marketplace to perform work in designated categories of work. For instance, African American-owned construction businesses were paid 5.1% of State construction contract dollars, but they made up 10.3% of the construction sector in the relevant State marketplace. Nonminority women-owned construction businesses were paid 7.5% of State construction contract dollars but made up 13.7% of the construction sector. According to the analysis, these differences were large and statistically significant.

The MBE program is scheduled to terminate July 1, 2022; it has been reauthorized eight times since 1990, the latest by Chapter 340 of 2017. **Exhibit 2** provides MBE participation rates for major Executive Branch agencies based on contract awards made during fiscal 2017, the most recent year for which data is available.

## *Requirements for Minority Business Enterprise Certification*

An MBE is a legal entity, other than a joint venture, that is:

- organized to engage in commercial transactions;
- at least 51% owned and controlled by one or more individuals who are socially and economically disadvantaged; and
- managed by, and the daily business operations of which are controlled by, one or more of the socially and economically disadvantaged individuals who own it.

A socially and economically disadvantaged individual is defined as a citizen or legal U.S. resident who is African American, Native American, Asian, Hispanic, physically or mentally disabled, a woman, or otherwise found by the State's MBE certification agency to be socially and economically disadvantaged. An MBE owned by a woman who is also a member of an ethnic or racial minority group is certified as either owned by a woman or owned by a racial or ethnic minority but not both. The Maryland Department of Transportation is the State's MBE certification agency.

A socially disadvantaged individual is someone who has been subject to racial or ethnic prejudice or cultural bias within American society because of his or her membership in a group and without regard to individual qualities. An economically disadvantaged individual is someone who is socially disadvantaged whose ability to compete in the free enterprise system has been impaired due to diminished capital and credit opportunities compared with those who are not socially disadvantaged. An individual with a personal net worth in excess of \$1.5 million, adjusted annually for inflation, is not considered economically disadvantaged. The inflation-adjusted limit for calendar 2019 is \$1,749,347.
