On page 9, after line 14, insert:

   “Article – Public Utilities

   7–207.

   (a) (1) In this section the following words have the meanings indicated.

   (3) (i) “Construction” means:

       1. any physical change at a site, including fabrication, erection, installation, or demolition; or
the entry into a binding agreement or contractual obligation to purchase equipment exclusively for use in construction in the State or to undertake a program of actual construction in the State which cannot be canceled or modified without substantial loss to the owner or operator of the proposed generating station.

(ii) “Construction” does not include a change that is needed for the temporary use of a site or route for nonutility purposes or for use in securing geological data, including any boring that is necessary to ascertain foundation conditions.

(5) “Qualified generator lead line” means an overhead transmission line that is designed to carry a voltage in excess of 69,000 volts and would allow an out-of-state Tier 1 or Tier 2 renewable source to interconnect with a portion of the electric system in Maryland that is owned by an electric company.

(b) (1) (i) Unless a certificate of public convenience and necessity for the construction is first obtained from the Commission, a person may not begin construction in the State of:

1. a generating station; or  
2. a qualified generator lead line.

(ii) If a person obtains Commission approval for construction under § 7–207.1 of this subtitle, the Commission shall exempt a person from the requirement to obtain a certificate of public convenience and necessity under this section.

(H) (1) On approval of a certificate of public convenience and necessity for the construction of a proposed generating station that is a covered project, as defined in § 3–718 of the Labor and Employment Article, the developer of the proposed generating station shall meet the requirements of § 3–718 of the Labor and Employment Article.

(2) The Maryland Department of Labor shall enforce this subsection.
7–207.1.

(a) This section applies to a person who:

(1) constructs a generating station:

   (i) designed to provide on–site generated electricity if:

       1. the capacity of the generating station does not exceed 70 megawatts; and

       2. the electricity that may be exported for sale from the generating station to the electric system is sold only on the wholesale market pursuant to an interconnection, operation, and maintenance agreement with the local electric company; or

   (ii) that produces electricity from wind if:

       1. the generating station is land–based;

       2. the capacity of the generating station does not exceed 70 megawatts;

       3. the electricity that may be exported for sale from the generating station to the electric system is sold only on the wholesale market pursuant to an interconnection, operation, and maintenance agreement with the local electric company;

       4. the Commission provides an opportunity for public comment at a public hearing as provided in subsection (f) of this section; and

       5. the generating station’s wind turbines are not located within a distance from the Patuxent River Naval Air Station that is determined by regulations adopted by the Commission in coordination with the Commander, Naval Air Warfare Center Aircraft Division, provided that the distance requirement under the regulation is:
A. not greater than is necessary to encompass an area in which utility scale wind turbines could create Doppler radar interference for missions at the Patuxent River Naval Air Station;

B. not greater than 46 miles, measured from location 38.29667N, 76.37668W; and

C. subject to modification if necessary to reflect changes in missions or technology at the Patuxent River Naval Air Station or changes in wind energy technology; or

(2) constructs a generating station if:

(i) the capacity of the generating station does not exceed 25 megawatts;

(ii) the electricity that may be exported for sale from the generating station to the electric system is sold only on the wholesale market pursuant to an interconnection, operation, and maintenance agreement with the local electric company; and

(iii) at least 10% of the electricity generated at the generating station each year is consumed on–site.

(b) The Commission shall require a person that is exempted from the requirement to obtain a certificate of public convenience and necessity to obtain approval from the Commission under this section before the person may construct a generating station described in subsection (a) of this section.

(G) ON APPROVAL OF AN EXEMPTION FROM THE REQUIREMENT TO OBTAIN A CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR THE CONSTRUCTION OF A PROPOSED GENERATING STATION THAT IS A COVERED PROJECT, AS DEFINED IN § 3–718 OF THE LABOR AND EMPLOYMENT ARTICLE, THE DEVELOPER OF THE PROPOSED GENERATING STATION SHALL MEET THE REQUIREMENTS OF § 3–718 OF THE LABOR AND EMPLOYMENT ARTICLE.

(2) The Maryland Department of Labor shall enforce this subsection.”.
