Preamble

EXPLANATION: CAPITALS INDICATE MATTER ADDED TO EXISTING LAW.
[Brackets] indicate matter deleted from existing law.
WHEREAS, Demographic changes in the State have increased the need to identify, deliver, and manage health care in cost–effective ways; and

WHEREAS, Medical adult day care is a structured group program that provides health, social, and related support services to functionally disabled adults; and

WHEREAS, Medical adult day care programs are provided to individuals who may also access home health care and medical services programs; and

WHEREAS, The delivery of medical adult day care, home health care, and medical care is fragmented and uncoordinated; and

WHEREAS, A majority of the cost of reimbursing these services is borne by the Maryland Medical Assistance Program, including services provided by managed care organizations; and

WHEREAS, Over the last decade the number of individuals aged 65 and older has grown by 33% in the State, creating an increased demand to meet the unique care needs of this population; and

WHEREAS, In surveys of seniors, 90% of the respondents have indicated a desire to age in their homes (“age in place”); and

WHEREAS, There is an increasing focus on addressing social determinants of health as studies have shown that 80% of an individual’s overall health is tied to nonmedical factors and that social isolation and loneliness impact 43% of seniors; and

WHEREAS, An integrated and flexible hybrid model for medical adult day care, home health care, and medical care would allow for active and ongoing assessment of the health needs of the senior population using these services and maintain engagement by individuals in their own health care needs; and

WHEREAS, Improved continuity of care would enable seniors to stay in their homes and in the community and defer higher levels of care, keeping them out of nursing homes and other acute care settings; now, therefore,
