Senate Bill 698  
Finance

(Senator Augustine)

---

Consumer Protection - Online and Biometric Data Privacy

---

This bill establishes numerous consumer protections and regulatory requirements related to online and biometric data. The bill also establishes the Task Force to Study Online Data Privacy, staffed by the Office of the Attorney General (OAG). By June 1, 2024, the task force must report its findings and recommendations to the Governor and specified committees of the General Assembly. Requirements related to activities that present a heightened risk of harm to a consumer apply only prospectively and may not be applied or interpreted to have any effect on (or application to) any personal data processing activities before the bill's October 1, 2023 effective date. Violation of the bill is an unfair, abusive, or deceptive trade practice under the Maryland Consumer Protection Act (MCPA), subject to MCPA's civil and criminal penalty provisions. If a "controller" violates the bill's prohibition against selling, leasing, or trading a consumer's biometric data, a consumer is authorized to bring an action in accordance with MCPA. **The task force terminates September 30, 2025.**

---

Fiscal Summary

**State Effect:** The bill's imposition of existing penalty provisions does not have a material impact on State finances or operations. OAG's Consumer Protection Division can handle the bill's requirements with existing resources. OAG can also provide staffing for the task force with existing budgeted resources; any expense reimbursements for task force members are assumed to be minimal.

**Local Effect:** The bill's imposition of existing penalty provisions does not have a material impact on local government finances or operations.

**Small Business Effect:** Meaningful.

---

## Analysis

### Bill Summary:

#### *Definitions and Applicability*

The bill defines several terms related to online and biometric data privacy. Notably, a “controller” is person that determines the purpose and means of processing personal data – either alone or jointly with others. A “processor” is a person that processes, stores, or otherwise uses personal data on behalf of a controller.

The bill specifies the types of data and entities to which its requirements apply. Specifically, the bill applies to a person that conducts business in the State. The bill also applies to a person that produces services or products that are targeted to residents of the State and, during the immediately preceding calendar year, either (1) controlled or processed the personal data of at least 100,000 consumers or (2) controlled or processed the personal data of at least 25,000 consumers and derived more than 25% of its gross revenue from the sale of personal data.

The bill specifies several entities to which its requirements do not apply, including State and local agencies, courts, and certain types of businesses subject to related federal laws. Additionally, certain data is also exempt from the bill’s requirements, including specified health and financial data.

#### *Consumer Rights and Controller Responsibilities*

The bill defines the rights a consumer may exercise to protect the consumer’s personal data, including, among other things, the right to delete personal data provided by (or obtained about) the consumer and to opt out of the processing of personal data (*e.g.*, targeted advertising).

The bill establishes a number of consumer protections, including:

- requiring a controller of data to establish a secure and reliable method for a consumer to exercise a right;
- establishing a timeframe and related requirements for a controller to respond to and/or comply with a request from a consumer;
- requiring the controller to notify the consumer in a specified manner if the controller chooses not to take action on a request;
- requiring a controller to provide a consumer, free of charge, with the information a consumer requests, subject to certain limitations; and

- requiring a controller to establish a process that a consumer may use to appeal a controller decision.

### *Limitations*

The bill specifies limitations on the requirements established for controllers and processors. Among other things, the bill may not be construed to prohibit a controller or processor from (1) complying with federal, State, or local laws or authorities; (2) preserving and protecting the integrity or security of a system; or (3) engaging in public or peer-reviewed scientific or statistical research in the public interest that meets specified requirements.

Additionally, the bill's requirements may not restrict a controller's or processor's ability to collect, use, or retain data for internal use to effectuate a product recall, identify and repair technical errors, or perform internal operations related to product integrity and performance.

### *Designation of Authorized Agent*

A consumer may designate an authorized agent to act on the consumer's behalf to opt out of the consumer's personal data processing, as specified, and certain individuals, such as the parent or legal guardian of a known child, may exercise the consumer rights directly on behalf of another individual.

### *Other Rules, Procedures, and Prohibitions*

The bill establishes numerous rules, procedures, and prohibitions related to controllers and processors. For instance, the bill:

- prohibits a controller from (1) selling, leasing, or trading a consumer's biometric data and (2) processing sensitive data concerning a consumer without obtaining the consumer's consent;
- requires a controller to limit the collection of personal data to what is (1) adequate, relevant, and reasonably necessary to collect, as specified, and (2) disclosed to the consumer;
- requires a controller to provide an effective mechanism for a consumer to revoke the consumer's consent and to stop processing the data no later than 15 days after the receipt of the request;
- establishes data protection and disclosure requirements that apply specifically for biometric data;
- prohibits discrimination against any consumer for exercising a right granted by the bill, as specified;

- requires a controller to disclose specified information when it sells personal data to third parties or processes personal data for targeted advertising;
- requires a controller to provide a consumer and the general public with a reasonable accessible, clear, and meaningful privacy notice that includes specified information about the controller’s data processing practices and information about how a consumer can exercise a right granted by the bill;
- requires a controller and processor to enter into a contract that includes specified requirements if a controller uses a processor to process the personal data of consumers;
- defines the responsibilities of both the controller and processor in the event that such a contract is entered into; and
- establishes more stringent procedures and requirements for processing activities that present heightened risk of harm to a consumer (*e.g.*, the processing of sensitive data).

The bill authorizes OAG to require a controller to make available a data protection assessment for compliance with the responsibilities established by the bill. The assessment is confidential and exempt from disclosure requirements under the Maryland Public Information Act.

*Task Force to Study Online Data Privacy*

The task force must (1) study and make recommendations regarding specified data privacy and information issues and (2) make recommendations for future data privacy legislation. Members of the task force may not receive compensation but are entitled to reimbursement for expenses under the standard State travel regulations.

**Current Law:** The Maryland Personal Information Protection Act (MPIPA) defines “personal information” as, among other things, biometric data of an individual generated by automatic measurements of an individual’s biological characteristics such as a fingerprint, voice print, genetic print, retina or iris image, or other unique biological characteristic, that can be used to uniquely authenticate the individual’s identity when the individual accesses a system or account in combination with an individual’s first name or first initial and last name, when the name or data elements are not encrypted, redacted, or otherwise protected by another method that renders the information unreadable or unusable.

MPIPA imposes certain duties on a business to protect an individual’s personal information. A business in possession of personal information must implement and maintain reasonable security procedures and practices to protect the information from unauthorized access, use, modification, or disclosure. If a data breach occurs, the business

must conduct, in good faith, a reasonable and prompt investigation to determine the likelihood that personal information of the individual has been (or will be) misused. If the business determines that personal information likely has been (or will be) misused, the owner or licensee of the computerized data must notify an affected individual as soon as practicable but not later than 45 days after the business discovers or is notified of the breach. For a business that only maintains personal data, the business must notify the owner or licensee of the breach as soon as practicable but not later than 10 days after the business discovers or is notified of the breach. Notification may be delayed if a law enforcement agency determines that the notification will impede a criminal investigation or jeopardize homeland or national security.

When a breach occurs, a business must also provide notice to OAG that includes (1) the number of Maryland residents affected by the breach; (2) a description of the breach, including when and how the breach occurred; (3) any steps the business has taken or plans to take relating to the breach; and (4) the form of notice and a sample of the notice that will be sent to individuals affected by the breach. The Act also establishes a specific notification process for breaches involving email account information.

Violation of MPIPA is an unfair, abusive, or deceptive trade practice under MCPA, subject to MCPA's civil and criminal penalty provisions.

#### *Maryland Consumer Protection Act*

An unfair, abusive, or deceptive trade practice under MCPA includes, among other acts, any false, falsely disparaging, or misleading oral or written statement, visual description, or other representation of any kind which has the capacity, tendency, or effect of deceiving or misleading consumers. The prohibition against engaging in any unfair, abusive, or deceptive trade practice encompasses the offer for or actual sale, lease, rental, loan, or bailment of any consumer goods, consumer realty, or consumer services; the extension of consumer credit; the collection of consumer debt; or the offer for or actual purchase of consumer goods or consumer realty from a consumer by a merchant whose business includes paying off consumer debt in connection with the purchase of any consumer goods or consumer realty from a consumer.

The Consumer Protection Division is responsible for enforcing MCPA and investigating the complaints of aggrieved consumers. The division may attempt to conciliate the matter, issue a cease and desist order, or file a civil action in court. A merchant who violates MCPA is subject to a fine of up to \$10,000 for each violation and up to \$25,000 for each repetition of the same violation. In addition to any civil penalties that may be imposed, any person who violates MCPA is guilty of a misdemeanor and, on conviction, is subject to a fine of up to \$1,000 and/or imprisonment for up to one year.

**Small Business Effect:** The bill establishes a significant regulatory framework related to online and biometric data. Thus, to the extent any small businesses in the State qualify as a controller and/or processor, they may be meaningfully affected.

---

### **Additional Information**

**Prior Introductions:** Similar legislation has not been introduced within the last three years.

**Designated Cross File:** HB 807 (Delegate Love) - Economic Matters.
