21 2–1602.

22 (a) The Department shall develop building energy performance standards for
23 covered buildings that achieve:

24 (1) A 20% reduction in net direct greenhouse gas emissions on or before
25 January 1, 2030, as compared with 2025 levels for average buildings of similar construction;
26 and

27 (2) Net-zero direct greenhouse gas emissions on or before January 1, 2040.

1 (b) To facilitate the development of building energy performance standards under
2 this section, the Department shall require the owners of covered buildings to measure and
3 report direct emissions data to the Department annually beginning in 2025.

4 (c) (1) On or before June 1, 2023, the Department shall adopt regulations to
5 implement this section.

6 (2) Regulations adopted under this section shall:

29 compliance pathway allowing the owner of a covered building to pay a fee for greenhouse
30 gas emissions attributable to the building's failure to meet direct greenhouse gas emissions
31 reduction targets; and

1 (vi) To the extent authorized by law, include financial incentives
2 recommended by the Building Energy Transition Implementation Task Force.

3 (3) The Department may not set an alternative compliance fee that is less

5 Environmental Protection Agency.

6 (d) Electric companies and gas companies shall provide energy data, including
