House Bill 300 (Delegate Kerr)
Health and Government Operations

State Government - Grants and Contracts - Reimbursement of Indirect Costs

This bill repeals a requirement that a State grant or contract – funded wholly by State funds, or with a combination of State and other nonfederal funds, and awarded to a nonprofit organization that has not negotiated and received a specified indirect cost rate – allow the nonprofit organization to reimburse indirect costs at a rate equal to at least 10%. Instead, a nonprofit organization may reimburse indirect costs at the *de minimis* rate established in specified federal regulations (currently 15%).

Fiscal Summary

State Effect: No effect on the *total* value of State contracts and grants to nonprofit organizations. However, to the extent that nonprofit organizations currently reimburse indirect costs at 10%, either fewer State funds are available for direct costs and services under grants and contracts or State expenditures (all funds) increase, potentially significantly, to maintain current levels of services. No effect on revenues.

Local Effect: Local governments that serve as pass-through entities for State grants must incorporate the higher reimbursement rate for indirect costs into their grants and contracts with nonprofit organizations, which they can do with existing resources. To the extent that local funds are commingled with State funds on some grants and contracts, fewer local funds are available for direct costs and services under grants and contracts to nonprofit organizations.

Small Business Effect: None.

Analysis

Bill Summary: The *de minimis* rate referenced in the bill is established by Subpart E of the federal Office of Management and Budget’s Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (referred to as the “OMB Uniform Guidance” in State law). It is found in 2 CFR 200.414 and is currently set at 15%.

Current Law: Chapter 734 of 2018 required that the terms of a grant or contract for the provision of services by a nonprofit organization that is funded either wholly with State funds or with a combination of State and other nonfederal funds allow for reimbursement of indirect costs. Under Chapter 734, indirect costs must be reimbursed at the rate that the nonprofit organization has negotiated and received either (1) under a direct federal award or (2) from a nonfederal entity based on specified federal cost principles. If the nonprofit organization has not negotiated and received an indirect cost rate under a direct federal award, it must be reimbursed at a rate of at least 10% of specified costs. The requirements of Chapter 734 apply if State funds are transferred to the nonprofit organization either directly by the State or through a third party.

Chapters 640 and 641 of 2019 clarified that Chapter 734 applies only to:

- a grant or contract awarded on or after October 1, 2018;
- a multi-year grant or contract awarded before October 1, 2018, if the grant or contract remains in effect after that date and funding for the grant or contract is required to be authorized separately for each fiscal year; and
- an extension or a renewal of a grant or contract if the extension or renewal was awarded on or after July 1, 2019.

It further clarified that reimbursement is not required for indirect costs incurred under a multi-year grant or contract during any fiscal year that begins before July 1, 2019.

Additional Comments: Revenues increase for nonprofit organizations currently using a 10% reimbursement rate for indirect costs under qualified State grants. Some State agencies advise that they already incorporate the OMB Uniform Guidance into their grant agreements, so some nonprofit organizations will experience no effect.

Additional Information

Recent Prior Introductions: Similar legislation has not been introduced within the last three years.

Designated Cross File: SB 127 (Senator Kagan) - Budget and Taxation.
