House Bill 1024 (Delegate Hutchinson, *et al.*)
 Environment and Transportation

Agriculture - Catastrophic Damage Caused by Deer

This bill authorizes the Maryland Department of Agriculture (MDA) to take extraordinary measures to control the local deer population and prevent future crop loss if it determines that deer have caused “catastrophic damage” to a field. The bill defines “catastrophic damage” as the loss of 50% or more of crops from a single field. MDA must adopt regulations to implement the bill.

Fiscal Summary

State Effect: General fund expenditures increase by \$117,700 in FY 2026. Future years reflect annualization and inflation. Revenues are not affected.

(in dollars)	FY 2026	FY 2027	FY 2028	FY 2029	FY 2030
Revenues	\$0	\$0	\$0	\$0	\$0
GF Expenditure	117,700	91,800	95,800	100,100	104,400
Net Effect	(\$117,700)	(\$91,800)	(\$95,800)	(\$100,100)	(\$104,400)

Note: () = decrease; GF = general funds; FF = federal funds; SF = special funds; - = indeterminate increase; (-) = indeterminate decrease

Local Effect: None.

Small Business Effect: Potential meaningful.

Analysis

Current Law: Maryland landowners or agricultural lessees who are experiencing severe economic loss to commercially grown crops (including row crops, truck crops, pasture, nursery stock, orchards, and certain tree plantings) or significant ecological damage to certain native plant communities due to deer may apply to receive a deer management

permit from the Department of Natural Resources (DNR). A deer management permit is issued after an investigation of the damage by DNR’s Wildlife and Heritage Service and a decision of what actions must be taken, if any, to reduce the deer population, considering the (1) nature, extent, and severity of damage; (2) type of damage; (3) time of year; and (4) deer population surveys and estimates. The permit must describe the hunting device to be used and the number and type of deer to be taken.

The permit allows permit holders or their agents, known as “designated shooters,” to remove deer from the designated property outside the established deer hunting seasons and deer bag limits, subject to permit conditions imposed by DNR, including on any Sunday throughout the year. Both a permit holder and all designated shooters are required to carry a copy of the permit signed by both the permit holder and designated shooter while attempting to take a deer under the terms of the permit. A deer management permit is valid for a period not to exceed one year and is free.

State Expenditures: General fund expenditures for MDA increase by \$117,712 in fiscal 2026, which accounts for the bill’s October 1, 2025 effective date. This estimate reflects the cost for MDA to hire one full-time agricultural resource conservation specialist to implement the bill’s authorization, including (1) surveying deer damage to determine whether “catastrophic damage” has occurred; (2) determining what extraordinary measures must be taken if catastrophic damage has occurred; (3) implementing those measures; (4) serving as a point of contact for deer-related inquiries from farmers; and (5) coordinating with DNR’s Wildlife and Heritage Service. The estimate assumes that (1) there are more than minimal occurrences of catastrophic damage and (2) implementation of extraordinary measures requires a relatively sustained effort to manage the local deer population and prevent future crop damage. MDA indicates that these activities cannot be absorbed by existing staff. The estimate includes a salary, fringe benefits, one-time start-up costs (including costs to purchase a vehicle), and ongoing operating expenses.

Position	1.0
Salary and Fringe Benefits	\$70,343
Vehicle Purchase	40,000
Operating Expenses	<u>7,369</u>
Total FY 2026 State Expenditures	\$117,712

Future year expenditures reflect a full salary with annual increases and employee turnover as well as annual increases in ongoing operating expenses.

As described above, this analysis assumes there are more than minimal occurrences of catastrophic damage. To the extent catastrophic damage instead occurs relatively infrequently, MDA may be able to implement the bill with existing resources.

Small Business Effect: Small business farmers experiencing significant crop loss may benefit from measures taken under the bill to control the local deer population and prevent future crop loss, to the extent those measures are more effective than those that are otherwise available under a deer management permit issued by DNR.
