<p>KABOOM! is a national nonprofit located in Bethesda, MD that is dedicated to ending playspace inequity in historically disinvested communities across America. We work with neighborhoods and school districts in Maryland, and other states, to create safe, engaging, and high-quality playgrounds that children help design and communities help build. We identify the areas we do our work in by prioritizing those that have experienced discrepancies in funding based on racial, economic, and social demographics across generations. Our data-driven and equity focused approach ensures that the kids we are helping through greater play access are the ones who can gain the most from the physical, emotional, and social benefits of play.</p>

KABOOM! has a public-private partnership (P3) with Baltimore City Schools that leverages private resources to match public investment in improving the quality of schoolyard playgrounds throughout the district. Over the last five years, KABOOM! has brought almost \$3 million in additional resources to the City and District to match the public resources which have been committed to this work. P3s are instrumental to bringing an entrepreneurial style of government which helps solve the challenges the public sector is being required to address in this rapidly evolving and dynamic environment.

The work we have done in Baltimore has been cited by national leaders in the outdoor recreation space at a variety of conferences and was recently the subject of a published KABOOM! case study on P3s. The support from Baltimore City Schools has been instrumental to our partnership and has made this initiative a resounding success. Working together with City Schools, KABOOM! employs an equity based evaluation system to select which projects to focus on. This equity based evaluation looks at the racialized history of Baltimores public investments from the early to late 20th century and how leaders are still dealing with the consequences of that history today. The private investment we have been able to secure to improve Baltimores outdoor recreation infrastructure is not only correcting this historic injustice but also putting our younger generation on a different public health outcome trajectory.

This work also relies on public sector partners, like the Maryland General Assembly, which has been instrumental over the last several years in expanding the public investment so that KABOOM! can leverage additional private matching funds. This support has accelerated our work and allowed this partnership to innovate with new and different kinds playspaces, like Nature Exploration Areas, which will be introduced to Baltimore City Schools in 2026.
