Senate Bill 160

(Chair, Judicial Proceedings Committee)(By Request -
Departmental - State Police)

Judicial Proceedings

**Public Safety - Licensed Firearms Dealers - Notification Regarding Potential
Compromise of Security Features**

This departmental bill requires a licensed firearms dealer who knows or reasonably should know that a burglary, attempted burglary, robbery, theft, or any other event may have compromised required security features to notify the Secretary of State Police within 24 hours after the dealer first discovers that the security features may have been compromised. The required notice is in addition to any report made to the local law enforcement agency or the Bureau of Alcohol, Tobacco, Firearms, and Explosives (ATFE). A violator is subject to existing penalties that apply to the failure to meet the required security features.

Fiscal Summary

State Effect: The bill's requirements can be handled with existing budgeted resources. The application of existing civil penalty provisions to violations of the bill is not anticipated to materially affect State revenues.

Local Effect: None.

Small Business Effect: The Department of State Police (DSP) has determined that this bill has minimal or no impact on small business (attached). The Department of Legislative Services concurs with this assessment.

Analysis

Current Law: Chapter 55 of 2022 prohibits a licensed firearms dealer from conducting business and storing firearms at a location unless (1) the premises on which the licensed

dealer operates is equipped with specified security features or (2) outside business hours, the licensed dealer locks all firearms stored on the premises in a vault, a safe, or a room or building that meets specified requirements. The Secretary of State Police must adopt rules and regulations to determine whether a licensed dealer has met the requirements. Pursuant to current regulations, the Secretary (1) must inspect the security requirements of a licensed dealer at least once every two years and (2) may inspect the security requirements at any time before being approved for a license, as a follow-up to a noncompliant inspection, during required inventory and record audits, and following a burglary/theft or attempts thereof.

A violator is subject to a maximum civil penalty of \$1,000 imposed by the Secretary. In addition to the civil penalty, a person who knowingly and willfully violates the requirements is subject to (1) for a second offense, suspension of the person's dealer's license, with the suspension remaining in effect until compliance is regained and (2) for a third or subsequent offense, revocation of the person's dealer's license. These penalties do not apply if the equipment or alarm system became temporarily inoperable at no fault of the licensed dealer.

Background: According to ATFE, during calendar 2024, licensed firearms dealers in the State reported 248 firearms lost or stolen. DSP advises that the bill is part of the department's strategy to combat gun violence in the State by ensuring that each licensed firearms dealer maintains the integrity of the required security features for the business. DSP reports that it conducts annual inspections of licensed firearms dealers for compliance with all statutory and regulatory requirements; however, a dealer is not required to notify DSP or any law enforcement entity if there is a failure of the security features or if the features have been compromised. DSP believes that any reported failure in security requirements should be inspected before the dealer is allowed to continue to store firearms at the location.

Additional Information

Recent Prior Introductions: Similar legislation has not been introduced within the last three years.
