Senate Bill 195

(Senator McKay)

Judicial Proceedings

**Motorcycles - Protective Headgear Requirement - Exception (In Remembrance
of Gary "Pappy" Boward)**

This bill exempts, from the requirement to wear specified protective headgear while operating or riding on a motorcycle, an individual age 21 or older who (1) has been licensed to operate a motorcycle for at least two years; (2) has completed an approved motorcycle rider safety course; or (3) is a passenger on a motorcycle operated by a rider who meets either of these criteria.

Fiscal Summary

State Effect: General fund revenues from traffic citations decrease minimally beginning in FY 2027. Any impact on Medicaid expenditures is assumed to be negligible, as discussed below.

Local Effect: None.

Small Business Effect: Potential minimal.

Analysis

Current Law: An individual may not operate or ride on a motorcycle unless the individual is wearing protective headgear that meets the standards established by the Motor Vehicle Administration administrator. The administrator is authorized to approve or disapprove of the protective headgear required for motorcycle operators and may adopt and enforce regulations that establish protective headgear standards. An individual who is riding in an enclosed cab is exempt from the protective headgear requirement. An individual may not operate a motorcycle unless the individual is wearing an eye-protective device approved by the administrator or the motorcycle is equipped with a windscreen.

“Protective helmet or headgear” means a device primarily intended to protect the upper part of the wearer’s head against a blow or impact. The *Federal Motor Vehicle Safety Standard 218, Motorcycle Helmets*, 49 CFR § 571.218 (1991), which is incorporated by reference in Maryland regulations, is adopted as the minimum standard for helmets required to be worn by operators and passengers on motorcycles. The protective headgear must be worn on the head with the chin strap properly fastened and in contact with the chin or jaw by both operator and passenger at all times that the motorcycle is in motion.

A violation of the protective headgear or eye-protective device/windscreen requirement is a misdemeanor, subject to a maximum fine of \$500. The prepayment penalty assessed by the District Court is \$110. The failure of an individual to wear required protective headgear may not be considered evidence of negligence or contributory negligence; limit liability of a party or an insurer; or diminish recovery for damages arising out of the ownership, maintenance, or operation of a motorcycle.

State Fiscal Effect: General fund fine revenues decrease minimally beginning in fiscal 2027 due to a reduction in the number of citations issued for failure to wear a helmet while riding on or operating a motorcycle. In fiscal 2025, 218 citations were issued statewide (with 56 guilty dispositions). The citation carries a prepayment penalty of \$110, including court costs. The actual decrease in general fund fine revenues cannot be reliably estimated at this time and depends on the number of individuals who qualify for the exemptions under the bill.

Medicaid expenditures (federal and general funds) could increase beginning as early as fiscal 2027 to the extent that the exemption from the protective headgear requirement results in a reduction in helmet use and an associated increase in more serious head injuries to crash-involved motorcyclists not otherwise covered by insurance. Federal fund revenues would increase correspondingly. However, any impact on Medicaid expenditures and federal fund revenues is assumed to be negligible.

For context, the Maryland Institute for Emergency Medical Services Systems reports that Maryland’s trauma centers treated 1,019 patients involved in motorcycle crashes during fiscal 2025, 860 of whom were age 21 or older. Of these patients:

- 243 sustained a head injury, all of whom required treatment and 17 subsequently died;
- more than one-third (84) of the patients with head injuries were admitted; 9 had hospital stays of just 1 day, but 12 had stays of more than 28 days; and
- about 40% (96) of the 243 riders who sustained head injuries were not wearing a helmet; the other riders were.

Additional Information

Recent Prior Introductions: Similar legislation has been introduced within the last three years. See SB 397 of 2025, SB 503 and HB 639 of 2024, and SB 933 of 2023.

Designated Cross File: None.
