SUPPORT

House Bill 1 – Build to Learn Act of 2020

House Appropriations Committee January 23, 2020

Testimony By: Mathew Palmer, Deputy Legislative Officer

The Hogan Administration supports this legislation, as well as our legislation, House Bill 338 – Building Opportunities Act of 2020, which will both provide for a historic investment in public school construction projects across the State. Our Administration’s legislation has the same goal of meeting our school construction needs in the state and this legislation very closely models the bill we filed this year and last. That is why we are very supportive of House Speaker Jones’ efforts to move this important issue forward. Education has always been the Administration’s top priority and this legislation represents the largest investment in public school construction in Maryland’s history. The Administration believes very strongly that every child deserves access to a world-class education regardless of what neighborhood they grow up in, and an important part of ensuring that is to provide students with facilities that are modern, safe, and efficient that encourage growth and learning.

The Administration’s legislation and this bill would allow the State to address almost all of the annual funding requests from local school systems over the next five years. These requests from the local school systems range from \$600 million to \$900 million annually, and this backlog can only be addressed with a targeted and bold infusion of capital funds.

The Administration’s legislation and this bill would not only meet the important need for public school construction funding, but would also spur economic and job growth across the State. The new construction projects are estimated to create more than 27,000 new jobs, \$1.2 million in new wages, and \$81.2 million in state and local tax revenue.

We ask this committee to support this extremely important issue to provide world class education facilities for our children, either through this bill or through our legislation, House Bill 338 – Building Opportunities Act of 2020, so that we address this pressing need this year. The children of Maryland cannot wait and they deserve safe, modern, and efficient facilities in which to learn.
