Dear Chairman Davis and Members of the Committee:

The Greenbelt City Council **supports HB 1034**. This enabling legislation will help local governments improve street lighting efficiency, effectiveness and maintenance at a fair price.

Street lighting is an important service in our community. Utility companies have been slow to embrace newer, more efficient lighting technologies such as LED. Additionally, there are often complaints about proper & timely maintenance, especially regarding outages. This legislation will allow those governments who so choose to take over ownership of these lights, thereby improving maintenance and energy efficiency as well as lowering the costs.

Thank you for your consideration and the City urges your **favorable vote for HB 1034**.

Sincerely,
