

State Council on Child Abuse and Neglect (SCCAN)

311 W. Saratoga Street, Room 405 Baltimore, Maryland 21201 Phone: (410) 767-7868 Mobile: (240) 506-3050

Claudia.Remington@maryland.gov

SCCAN is an advisory body required by Maryland Family Law Article (Section 5-7A) "to make recommendations annually to the Governor and General Assembly on matters relating to the prevention, detection, prosecution, and treatment of child abuse and neglect, including policy and training needs."

TESTIMONY IN SUPPORT OF HB 839:

Labor and Employment—Family and Medical Leave Insurance Program—Establishment
(Time to Care Act of 2020)

TO: Hon. Dereck E. Davis, Chair, and members of the House Economic Matter Committee FROM: Wendy Lane, MD, MPH, Chair, State Council on Child Abuse & Neglect (SCCAN) Claudia Remington, Executive Director, State Council on Child Abuse & Neglect (SCCAN)

DATE: February 24, 2020

The State Council on Child Abuse and Neglect (SCCAN) strongly supports HB 839 which would establish a paid family and medical leave program to the benefit of Maryland's children and their families. It will provide employees up to 12-weeks paid leave to care for new children, family members with serious health conditions or disabilities, or themselves. Primary prevention of child maltreatment is a critical focus of the Council. Investing in the healthy development of the next generation is critical to reducing child maltreatment in Maryland.

Maryland's Future Needs Paid Family Leave

- In Maryland, we take seriously our role as stewards of the next generation, and know that our ability to raise healthy children who will lead tomorrow's communities requires smart and innovative thinking today. The good news is that the science of the developing brain and the Adverse Childhood Experience (ACE) Study are clear about what children need to thrive.
- The time after the birth or adoption of a baby is an essential time of development for babies and families. Because early relationships nurture early brain connections that form the foundation for all learning and relationships that follow, parents and caregivers are on the front line of preparing our future workers, innovators, and citizens.
- Most working parents do not have access to paid family leave. Many parents must make the
 impossible choice between unhurried time to bond with their babies and losing their jobs or
 economic security.
- Now is the time for policymakers to secure the best beginnings for children and the best future for our country by supporting a comprehensive paid family and medical leave program.

Paid Family Leave Supports Babies' Health & Development – Newborns reap the benefits of paid family leave, including:

- Better bonding with parentsⁱ
- Increased breastfeeding, including the health benefits for mother and childⁱⁱ
- Improves vaccination completionⁱⁱⁱ
- Decreased infant mortality^{iv}
- Increased placement in high quality stable childcare^v

Paid Family Leave has been Shown to Reduce Child Abusevi

- Research published in the journal *Injury Prevention* has shown that paid family leave is linked with
 fewer cases of abuse head trauma (AHT) in infants. AHT, including shaken baby syndrome, was
 shown to occur less in California, a state with paid family leave, as compared with seven states
 without the policy. AHT declined in California while other states' numbers actually rose during 20072009, during the "Great Recession".
- AHT is a leading cause of fatal child maltreatment in young children.
- According to lead researcher Joanne Klevens, M.D., Ph.D., M.P.H., of the National Center for Injury
 Prevention and Control at the Centers for Disease Control and Prevention (CDC), the study found
 that California's 2004 paid family leave policy was associated with decreased rates of AHT admissions
 in children under two years old compared to the states without this policy. The national average of
 AHT cases in 50 per 100,000 children. The California policy was associated with a fall of 5.1 cases per
 100,000 children under one. As current prevention efforts have not been proven consistently
 effective in reducing AHT, this finding is significant.
- What's the connection between AHT and paid family leave? Parental stress and maternal depression are risk factors for child maltreatment. AHT is often a reaction to a baby's incessant crying and can result in long-term damage and even death of the infant. Paid family leave is associated with a
 - Reduction in parental stress, including financial stress
 - Reduction in maternal depression^{vii}

For these reasons, the Maryland State Council on Child Abuse & Neglect (SCCAN) respectfully urges a favorable report on HB 839, the Time to Care Act of 2020.
