Testimony of Vic Pascoe 308 Chester Avenue Annapolis MD 21403

Dear Committee:

I have lived in Eastport (Annapolis) for 20 years. My house is 16 miles (on a direct path) to the main landing runway at BWI Airport. (see attached map)

Over the last 2 years, I have noticed a distinct change to the landing pattern and the noise of airplanes flying directly over my house. These are planes flying from the east, directly over downtown Annapolis, and on to BWI runway 31

I have observed planes flying at low altitude, most under or at 4000 ft but many at lower altitudes as low as 1850 feet on April 23, 2019. I am 16 miles from the airport. There is no reason a plane needs to be that low 16 miles out. This low altitude flying results in planes using their throttle to keep the engines under power while flying above my house, instead of gliding under less power from a higher altitude. (see attached data showing altitude and distance from my house) The data provided is not exhaustive, it is only the data that I have reported,

What this causes are: Definite increase in noise, starting sometimes as early as 5 am and going well into the evening till 11pm. Occasionally I hear a flight around 2-3am which I assume is FEXEX or other package carriers. The noise is so loud on some days, that if I am on my porch, I need to stop talking until the plane flies by if I'm in conversation or on the phone. It is loud enough to wake me up.

The other disturbing issue I have noticed is the amount of fall out on my roof, car, driveway and steps. It is most pronounced on my roof, which is flat, and is designed as a roof top deck. (see picture attached)

It is normally a clean, grey color and inviting to walk on in the summer, even in barefeet. For the last year and a half, the roof has become almost black, so bad that you can write your name in the soot and you certainly would not walk on it barefooted.

This soot can ONLY be coming from the sky, and my assertion is that the planes are flying so low that anything coming out of the plane cannot evaporate before it hits the ground. The visual evidence is clear, what is unclear is what damage is this doing to our food, our lawns, our health ??

I urge you to do whatever you can to stem this issue before the problem gets worse and before the airport continues to expand and add more flights.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read 'Vic Pascoe', with a stylized flourish extending from the end.

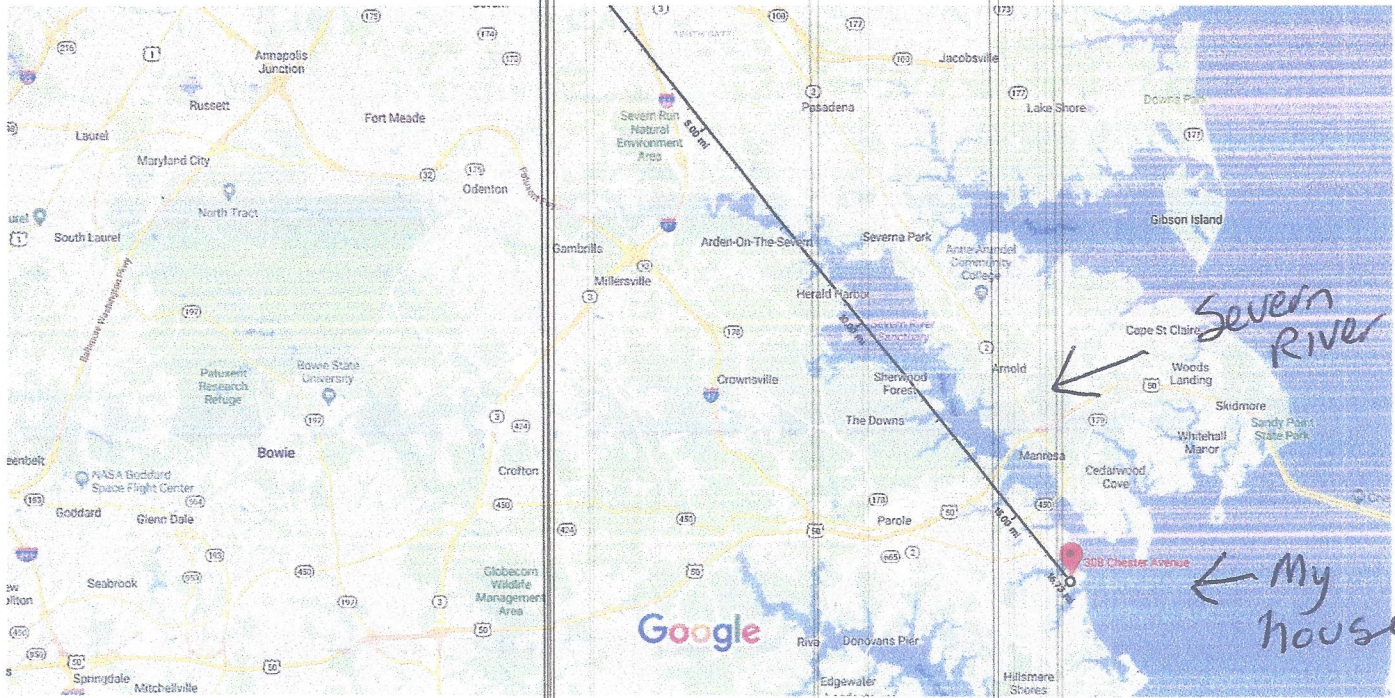

Vic Pascoe
