I want to add my letter of support for this legislation - MD SB 0416.

I am a practicing speech-language pathologist who has been waiting for this legislation for 35 years! This bill would help me improve the continuity of care for my students as they cross state lines. It would improve access to SLP providers like me. It would facilitate teletherapy treatment to all of my students — I work exclusively with students in teletherapy and own a clinic of SLPs that see students in office and via teletherapy.

This bill would break down barriers to access and enhance portability. Please support this bill!
