RE: Senate Bill 896 – Commission on Student Behavioral Health and Mental Health Treatment - INFORMATION

Dear Chair Pinsky:

The Maryland Health Care Commission (MHCC) respectfully submits this letter of information regarding Senate Bill 896 (SB 896). SB 896 establishes a Commission on Student Behavioral Health and Mental Health Treatment (Commission).

The MHCC believes that activities required by SB 896 are crucial to the health of children and young adults. The MHCC recommends that the Commission, if established, consider telehealth as a modality for delivering student behavior health and mental health treatment. Telehealth can provide effective and adaptable solutions to existing barriers to delivering care to students.

Since 2014, the MHCC has awarded 16 telehealth grants to qualified health care organizations to implement innovative telehealth pilots in the State. These grants assessed the value of telehealth interventions across various care settings. A school-based telehealth and behavior health pilot are among the grant awards. Lessons learned from the grant projects inform future applications of telehealth, help develop better practices and improve implementation efforts, and inform policies to support the advancement of telehealth.

The Senate Finance Committee requested in 2018 that the MHCC study school-based telehealth programs, and develop an approach for improving policies related to school-based telehealth to reduce the barriers to telehealth use in schools. The MHCC convened a workgroup consisting of diverse stakeholders; a final report was submitted in October 2019 to the Senate Finance
