

TESTIMONY IN SUPPORT OF HB 209

February 11, 2020 * ENT & ECM Committees

Chairmen Barve & Davis & Members of the Committees:

Here are the some reasons that we support this ban.

#1-Reduce Waste: According to the Center for Biological Diversity, a plastic bag is used for an average of 12 minutes, but can persist in our environment, and pollute our communities, for generations. Nothing we use for a few minutes should be allowed to pollute our communities and the Bay for hundreds of years—especially when we don't really need it.

#2-Reduce Waste: Each year, the average American uses more than 300 single-use disposable bags, and only about 1% of these bags are returned for recycling, with even fewer actually going through the process. Additionally, plastic bags can only go through the recycling process once or twice - recycling delays a plastic bag's inevitable disposal in a landfill, our waterways, or an incinerator but it certainly doesn't prevent it.

#3-Reduce Waste: We do not need single use plastic bags. They were only introduced in this country in the 1970's. We had a civilized, modern society before these bags became part of everyday commercial life, and we need to move away from them.

#4-Reduce pollution: Plastic bag disposal is a lose/lose/lose. Virtually un-recyclable, when we dispose of them they end up buried in leaky landfills or burned in incinerators. If they get loose they end up littering our neighborhoods, roads, and waterways. Plastic bags are lightweight and can be caught by the wind and carried into our waterways where it eventually leads to the ocean. Plastic bag waste harms health, quality of life, and the environment.

We respectfully request a favorable report on HB0209.
