Re: HB 517 – Constitutional Amendment – Environmental Rights - **Oppose**

Delmarva Poultry Industry, Inc. (DPI), the 1,700-member trade association representing the meat-chicken growers, processing companies and allied business members on the Eastern Shore of Maryland, the Eastern Shore of Virginia, and Delaware opposes HB 517 and urges an unfavorable committee report.

HB 517 has the appearance of being a bill that any resident of Maryland would want – a clean and healthy environment. And no one understands that want more than farmers who are often coined a the “first environmentalists.” Farmers make their living off the land that quite often they also live on, and clean water and air are important to them as well.

However, farmers are also under a lot of regulations and restrictions, especially poultry growers. For instance, most commercial chicken growers are required to apply for a Concentrated Animal Feeding Operation permit which is a general discharge permit issued by the Maryland Department of the Environment, although the permit is written in a way that there is **no discharge** from a chicken farm. These permits are already timely, with a public participation process that has caused farmers months, even years in delay from receiving the permit. And usually the public participation process has little to do with the actual permit, but it does create stress to the farmer, a small business owner. As a matter of fact, in the ten years of MDE administering this permit for chicken growers, DPI is only aware of one public process that has led to a major change in the permit for the farmer.

If HB 517 were to pass, then the chicken community would anticipate even more public participation, perhaps even from those that have very little standing or even living in the area where the chicken farms are located. There are a number of laws and rules in place in Maryland to help protect the environment. Chicken farmers have abided by those laws, including having additional expenses to operate than even those in neighboring states. However, we have grave concerns about what unintended consequences and pressures may be put on farmers by those that simply don't understand what laws and rules are already in place, or sadly, don't care.

We urge an unfavorable vote on HB 517.
